

AnMed Systems Disruption

Published: July 26, 2026

AnMed experiences cybersecurity disruption; some services closed Monday, July 27.

AnMed is currently experiencing a cybersecurity disruption involving malware that is impacting our network. We are working diligently to assess our systems, investigate the full nature and scope of the issue, and securely restore our systems to full functionality as quickly as possible with the assistance of third-party cybersecurity specialists, as well as state and federal authorities.

Protecting patients and providing safe, high-quality care remain AnMed's highest priorities. Decisions regarding procedures, patient transfers, diversions and operational processes are being made with patient safety as the guiding principle.

AnMed Medical Group offices will be closed **Monday, July 27**. Patients with elective procedures scheduled for Monday, July 27, will be contacted directly by AnMed staff with additional information. AnMed Imaging Services also will be closed Monday, July 27.

AnMed [Urgent Care locations](#), [AnMed Kids Care](#) and [AnMed Integrated Therapy locations](#) and [AnMed Laboratory Services](#) will open as scheduled on **Monday, July 27**.

We are coordinating closely with emergency medical services, regional hospitals and public safety partners to ensure patients continue to receive the care they need in the most appropriate setting. We are grateful to our healthcare partners across the region and to the Upstate community for their collaboration, patience and support.

We also extend sincere thanks to its physicians, nurses, advanced practice providers, clinical teams and all employees whose professionalism, flexibility and extraordinary efforts are helping ensure patients continue to receive safe care during this response.

Additional updates, including operational plans for the coming days, will be shared as more information becomes available.
