

iRhythm Holdings Statement on Cybersecurity Incident

iRhythm Holdings maintains a comprehensive cybersecurity and information security program designed to protect company systems, data, and operations. Our teams continuously monitor the threat landscape and implement safeguards aligned with industry practices.

Consistent with these security protocols, we recently identified a cybersecurity incident and promptly activated our incident response plans, launching an investigation with support from external advisors and cybersecurity experts.

We have not identified any impact to our products, our clinical or medical device systems, our connections to customers, our manufacturing and distribution operations, patient safety, or our ability to meet patient needs. In addition, we do not store or retain individual financial account information or payment card information.

As we actively investigate, we will notify individuals affected by this incident in accordance with applicable law and take steps as needed to protect and remediate the impact to them.

At iRhythm, the patient is at the heart of everything we do. The trust placed in us by patients, clinicians and customers is fundamental to our mission, and protecting the privacy and security of the information entrusted to us is an important part of that commitment. We remain focused on safeguarding our systems and data as we continue to respond to this incident.
