

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF PENNSYLVANIA

IN RE: GENERIC PHARMACEUTICALS
PRICING ANTITRUST LITIGATION

MDL 2724
16-MD-2724
HON. CYNTHIA M. RUFÉ

IN RE: PRAVASTATIN CASES

16-PV-27240

THIS DOCUMENT RELATES TO:

ALL DIRECT PURCHASER ACTIONS

16-PV-27241

KPH HEALTHCARE SERVICES, INC.,
a/k/a KINNEY DRUGS, INC., individually
and on behalf of all others similarly situated

Civil Action No.

Plaintiffs,

v.

ACTAVIS HOLDCO U.S., INC.,
APOTEX CORP., DR. REDDY'S
LABORATORIES, INC., GLENMARK
PHARMACEUTICALS INC., USA, LUPIN
PHARMACEUTICALS, INC., MYLAN INC.,
MYLAN PHARMACEUTICALS, INC.,
TEVA PHARMACEUTICALS USA, INC., and
ZYDUS PHARMACEUTICALS (USA) INC.,

Jury Trial Demanded

Defendants.

I. INTRODUCTION

1. Plaintiff KPH Healthcare Services, Inc., a/k/a Kinney Drugs, Inc. ("Plaintiff"), brings this Class Action Complaint on behalf of itself and on behalf of a Class of direct purchasers (hereinafter referred to as "Class Members") who purchased 10 milligram, 20 milligram, 40 milligram, and 80 milligram tablets of generic Pravastatin sodium ("Pravastatin")

from Defendants Actavis Holdco U.S., Inc., Apotex Corp., Dr. Reddy's Laboratories, Inc., Glenmark Pharmaceuticals Inc., USA, Lupin Pharmaceuticals, Inc., Mylan, Inc., Mylan Pharmaceuticals Inc., Teva Pharmaceuticals USA, Inc., and Zydus Pharmaceuticals (USA) Inc., during the period from July 1, 2013 to the present (hereinafter referred to as "Class Period").

2. Plaintiff seeks to recover damages incurred by itself and the Class due to Defendants' and co-conspirators' violation of Section 1 of the Sherman Act, 15 U.S.C. § 1, by engaging in an overarching scheme to eliminate competition in the market for generic Pravastatin and to artificially inflate the prices through unlawful agreements.

3. As a result of Defendants' anticompetitive scheme, Plaintiff and Class Members paid more for generic Pravastatin than they otherwise would have paid in the absence of Defendants' unlawful conduct. As set forth below, Defendants' scheme violates the federal antitrust laws and, in particular, Section 1 of the Sherman Act, 15 U.S.C. § 1 ("Sherman Act").

4. Plaintiff makes the allegations herein based on personal knowledge and investigation of these matters relating to itself and upon information and belief as to all other matters.

II. NATURE OF THE CASE

5. Defendants have collectively and unlawfully colluded to restrain and/or eliminate competition by engaging in an anticompetitive conspiracy designed to foreclose competition in the market for generic Pravastatin in the United States, in violation of Section 1 of the Sherman Act. This misconduct enabled each and every Defendant to overcharge direct purchasers for generic Pravastatin.

6. Plaintiff, on behalf of itself and the proposed Class, seeks redress for the overcharge damages sustained as a result of Defendants' unlawful conspiracy and other

anticompetitive conduct in violation of Section 1 of the Sherman Act, 15 U.S.C. § 1. But for Defendants' illegal conduct, Plaintiff and Class Members would not have paid supracompetitive prices for generic Pravastatin.

7. Plaintiff's allegations made on behalf of itself and Class Members are based on information made public during government investigations of Defendants for alleged unlawful conduct in the generic drug market. In 2014, the U.S. Department of Justice, Antitrust Division ("DOJ") began an in-depth investigation of alleged criminal conduct in the generic drug industry. As a result of the DOJ's investigation, grand jury subpoenas were issued to Defendants Actavis, Mylan and Dr. Reddy's.

8. Generic Pravastatin is not the only drug at issue in the DOJ's investigation.

9. The DOJ's 2014 investigation followed a congressional hearing and investigation prompted by the National Community Pharmacists Association's ("NCPA") January 2014 correspondence to the U.S. Senate Health Education Labor and Pensions ("HELP") Committee and the U.S. House Energy and Commerce Committee requesting hearings on the significant spike in generic drug pricing.¹ The NCPA's news release states,

Pharmacy acquisition prices for many essential generic drugs have risen by as much as 600%, 1,000% or more, according to a survey of more than 1,000 community pharmacists conducted by NCPA. The same survey found that patients are declining their medication due to increased co-pays (or total costs for the uninsured) and that the trend has forced more seniors into Medicare's dreaded coverage gap (or "donut hole") where they must pay far higher out-of-pocket costs.

"Over the last six months I have heard from so many of our members across the U.S. who have seen huge upswings in generic drug prices that are hurting patients and pharmacies ability to operate," NCPA CEO B. Douglas Hoey, RPh, MBA wrote in a letter to the panels' respective leaders, Chairman Tom Harkin (D-Iowa)

¹ News release available at <http://www.ncpanet.org/newsroom/news-releases/2014/01/08/generic-drug-price-spikes-demand-congressional-hearing-pharmacists-say>.

and Ranking Member Lamar Alexander (R-Tenn.) and Chairman Fred Upton (R-Mich.) and Ranking Member Henry Waxman (D-Calif.).

10. NCPA's survey of community pharmacists found the following:

- 77% of pharmacists reported 26 or more instances over the past six months of a large upswing in a generic drug's acquisition price.
- 86% of pharmacists said it took the pharmacy benefit manager (PBM) or other third-party payer between two and six months to update its reimbursement rate (but not retroactively).
- Patients may be referred to other pharmacies because the community pharmacy could not absorb losses of \$40, \$60, \$100 or more per prescription filled, due to inadequate and/or outdated reimbursement rates.
- 84% of pharmacists said the unsustainable losses per prescription are having a "very significant" impact on their ability to remain in business to continue serving patients.

11. In December 2016, the DOJ filed the first criminal indictments to result from the ongoing investigation of the generic drug industry.² On December 12 and December 13, 2016, the DOJ filed separate two-count felony indictments in the U.S. District Court for the Eastern District of Pennsylvania against two former executives of Heritage Pharmaceuticals, Inc. for conspiring to allocate customers and fix the prices of two other generic drugs, doxycycline hyclate and glyburide.

12. State Attorneys General are also conducting ongoing investigations of the generic drug industry. On December 15, 2016, Connecticut Attorney General George Jepsen, along with the Attorney Generals of nineteen other states, filed suit in the U.S. District Court for the District of Connecticut against Aurobindo Pharma USA, Inc., Citron Pharma, LLC, Heritage Pharmaceuticals, Inc., Mayne Pharma (USA), Inc., Mylan Pharmaceuticals, Inc., and Teva

² See *U.S. v. Glazer*, 2:16-cr-00506-RBS (E.D. Pa.) and *U.S. v. Malek*, 2:16-cr-00508-RBS (E.D. Pa.).

Pharmaceuticals USA, Inc., for price-fixing of doxycycline hyclate delayed release and glyburide (“the AG Complaint”).³ The AG Complaint states claims under Section 1 of the Sherman Act, 15 U.S. C. § 1, and notes that, “the Plaintiff States have uncovered a wide-ranging series of conspiracies implicating numerous different drugs and competitors, which will be acted upon at the appropriate time.” Twenty additional states have since joined.

13. Plaintiff reserves the right to amend its complaint to include additional parties and claims related to the pricing of other generic drugs as new information from the government investigations becomes public.

III. JURISDICTION AND VENUE

14. This Court has jurisdiction over the subject matter of this action as it arises under Section 1 of the Sherman Act, 15 U.S.C. § 1, and Sections 4 and 16 of the Clayton Act, 15 U.S.C. §§ 15, 26. Further, this Court has jurisdiction under 28 U.S.C. §§ 1331, 1337(a).

15. Venue is proper in this District pursuant to 15 U.S.C. §§ 15 and 22 and 28 U.S.C. § 1391(b) and (c) because during the Class Period, the Defendants transacted business in the United States, including in this District.

16. During the Class Period, Defendants sold and shipped generic drugs in a continuous and uninterrupted flow of interstate commerce, which included sales of generic Pravastatin in the United States, including in this District. Defendants’ conduct had a direct, substantial, and reasonably foreseeable effect on interstate commerce in the United States, including in this District.

17. This Court has personal jurisdiction over each Defendant because, inter alia, each Defendant: (a) transacted business throughout the United States, including in this District; (b)

³ See *Connecticut et al. v. Aurobindo Pharma USA, Inc. et al*, 3:16-cv-02056-VLB (D. Conn.).

participated in the selling and distribution of generic Pravastatin throughout the United States, including in this District; (c) had and maintained substantial contacts with the United States, including in this District; and/or (d) was engaged in an unlawful conspiracy to inflate the prices for generic Pravastatin that was directed at and had the intended effect of causing injury to persons residing in, located in, or doing business throughout the United States, including in this District.

IV. THE PARTIES

A. PLAINTIFF

18. Plaintiff KPH Healthcare Services, Inc. a/k/a Kinney Drugs, Inc. (“KPH”) is a corporation organized under the laws of the state of New York, with headquarters in Gouverneur, New York. KPH operates retail and online pharmacies in the Northeast under the name Kinney Drugs, Inc. KPH directly purchased generic Pravastatin from one or more Defendants during the Class Period. For example, KPH purchased generic Pravastatin from Defendant Apotex. As a result of Defendants’ antitrust conspiracy, KPH paid supracompetitive prices for its generic Pravastatin purchases and KPH was injured by the illegal conduct alleged herein.

B. DEFENDANTS

19. Defendant Actavis Holdco U.S., Inc. (“Actavis”) is a corporation with its principal place of business at Morris Corporate Center III, 400 Interpace Parkway, Parsippany, New Jersey, 07054. In August 2016, Teva Pharmaceuticals U.S., Inc. acquired Actavis from Allergan plc for \$40.5 billion. In connection with this acquisition, Allergan assigned certain assets of its “generics business” to Actavis, so that by acquiring Actavis, Teva also acquired Allergan’s generics business. Actavis manufactures, markets, and sells generic drug products.

During the Class Period, Actavis sold generic Pravastatin to purchasers in this District and throughout the United States.

20. Defendant Apotex Corp. (“Apotex”) is a corporation with its principal place of business at 2400 North Commerce Parkway, Suite 400, Weston, Florida, 33326. Apotex is a subsidiary of Apotex, Inc., a Canadian company with its principal place of business at 150 Signet Drive, Toronto, Canada, M9L 1T9. Apotex manufactures, markets, and sells various generic drugs. During the Class Period, Apotex sold generic Pravastatin to purchasers in this District and throughout the United States.

21. Defendant Dr. Reddy’s Laboratories, Inc. (“Dr. Reddy’s”) is a corporation with its principal place of business at 107 College Road East, Princeton, New Jersey, 08540. Dr. Reddy’s is a subsidiary of Dr. Reddy’s Laboratories Ltd., an Indian company with its principal place of business located at 8-2-337, Road No. 3, Banjara Hills, Hyderabad Telangana, India, 500034. Dr. Reddy’s manufactures, markets, and sells various generic drugs. During the Class Period, Dr. Reddy’s sold generic Pravastatin to purchasers in this District and throughout the United States.

22. Defendant Glenmark Pharmaceuticals Inc., USA (“Glenmark”) is a Delaware corporation with its headquarters located at 750 Corporate Drive, Mahwah, New Jersey. Glenmark is a wholly-owned subsidiary of Glenmark Pharmaceuticals Limited, a company organized under the laws of India with its principal executive offices at Glenmark House, B D S Marg, Chakala, Off Western Express Highway Andheri € , Mumbai, India. During the Class Period, Glenmark sold generic Pravastatin to purchasers in this District and throughout the United States.

23. Defendant Lupin Pharmaceuticals, Inc. (“Lupin”) is a corporation with its principal place of business at Harborplace Tower, 111 South Calvert Street, Baltimore, Maryland, 21202. Lupin is a subsidiary of Lupin Limited, an Indian company with its principal place of business at B/4 Laxmi Towers, Bandra Kurla Complex, Bandra (E), Mumbai 400 051, India. Lupin manufactures, markets, and sells generic versions of brand pharmaceutical products. During the Class Period, Lupin sold generic Pravastatin to purchasers in this District and throughout the United States.

24. Defendant Mylan Inc. (“Mylan”) is a Pennsylvania corporation with its principal executive offices at 1000 Mylan Boulevard, Canonsburg, Pennsylvania. Mylan is a wholly-owned subsidiary of Mylan N.V., a company organized under the laws of the Netherlands with its principal executive offices at Building 4, Trident Place, Mosquito Way, Hatfield Herfordshire, England. During the Class Period, Mylan sold generic Pravastatin to purchasers in this District and throughout the United States.

25. Defendant Mylan Pharmaceuticals Inc. is a West Virginia corporation with its principal place of business at 781 Chestnut Ridge Road, Morgantown, West Virginia 26505. Defendants Mylan Inc. and Mylan Pharmaceuticals Inc. are collectively referred to as “Mylan.”

26. Defendant Teva Pharmaceuticals USA, Inc. (“Teva”) is a Delaware corporation that has its headquarters at 1090 Horsham Road, North Wales, Pennsylvania. Teva is a wholly-owned subsidiary of Teva Pharmaceutical Industries Ltd., a company organized under the laws of Israel with its principal executive offices at 5 Basel Street, Petach Tivka 49131, Israel. During the Class Period, Teva sold generic Pravastatin to purchasers in this District and throughout the United States.

27. Defendant Zydus Pharmaceuticals (USA) Inc. (“Zydus”) is a New Jersey corporation with its principal place of business at 73 Route 31 N., Pennington, New Jersey, 08534. Zydus is a subsidiary of Zydus Pharmaceuticals Limited, an Indian pharmaceutical company. Zydus manufactures, markets, and sells various generic pharmaceutical products. During the Class Period, Zydus manufactured and sold generic pravastatin sodium to purchasers in this District and throughout the United States.

28. Defendants have engaged in the conduct alleged in this Complaint, and/or the Defendants’ officers, agents, employees, or representatives have engaged in the alleged conduct while actively involved in the management of Defendants’ business and affairs.

V. UNIDENTIFIED CO-CONSPIRATORS

29. Various other persons, firms, entities and corporations, not named as Defendants in this Complaint, have participated as co-conspirators with Defendants in the violations alleged herein, and have aided, abetted and performed acts and made statements in furtherance of the conspiracy.

30. The true names and capacities, whether individual, corporate, associate, or representative, is unknown to Plaintiff at this time. Plaintiff may amend this Complaint, as necessary, to allege the true names and capacities of additional co-conspirators as their identities become known through discovery.

31. At all relevant times, other persons, firms, and corporations, referred to herein as “co-conspirators,” the identities of which are presently unknown, have willingly conspired with Defendants in their unlawful monopolization as described herein.

32. The acts alleged herein that were done by each of the co-conspirators were fully authorized by each of those co-conspirators, or were ordered or committed by duly authorized

officers, managers, agents, employees, or representatives of each co-conspirator while actively engaged in the management, direction, or control of its affairs.

VI. FACTUAL ALLEGATIONS

A. Overview of Generic Drug Market

33. Generic drugs typically provide consumers with a lower-cost alternative to brand name drugs while providing the same treatment. Specifically,

A generic drug is the same as a brand name drug in dosage, safety, strength, how it is taken, quality, performance, and intended use. Before approving a generic drug product, FDA requires many rigorous tests and procedures to assure that the generic drug can be substituted for the brand name drug. The FDA bases evaluations of substitutability, or “therapeutic equivalence,” of generic drugs on scientific evaluations. By law, a generic drug product must contain the identical amounts of the same active ingredient(s) as the brand name product. Drug products evaluated as “therapeutically equivalent” can be expected to have equal effect and no difference when substituted for the brand name product.⁴

34. Further, “[d]rug products classified as therapeutically equivalent can be substituted with the full expectation that the substituted product will produce the same clinical effect and safety profile as the prescribed product.”⁵

35. Generic versions of brand name drugs are priced significantly below the brand name versions. Because of the price differentials, and other institutional features of the pharmaceutical market, generic versions are liberally and substantially substituted for their brand name counterparts. In every state, pharmacists are permitted (and, in some states, required) to substitute a generic product for a brand name product unless the doctor has indicated that the prescription for the brand name product must be dispensed as written. States adopted substitution laws following the federal government’s 1984 enactment of the Hatch-Waxman Act

⁴ <http://www.fda.gov/Drugs/InformationOnDrugs/ucm079436.htm#G>

⁵ *Id.*

(Pub. L. No. 98-417, 98 Stat. 1585 (codified at 15 U.S.C. §§ 68b-68c, 70b; 21 U.S.C. §§ 301 note, 355, 360cc; 28 U.S.C. § 2201; 35 U.S.C. §§ 156, 271, 282)).

36. Economic literature in the healthcare market has demonstrated that competition by generic products results in lower prices for consumers. In the period before generic entry, a brand name drug commands 100% of the market share for that drug and the brand name manufacturer can set the price without the impact of competitive market forces. Once the first generic enters the market, however, a brand name drug rapidly loses sales, as much as 80% or more by the end of the first year. As more generic manufacturers enter the market, prices for generic versions of a drug predictably will continue to decrease because of competition among the generic manufacturers, and the loss of sales volume by the brand name drug to the corresponding generic accelerates as more generic options are available to purchasers.⁶ Generic drugs that are substitutable for a brand name drug become like any other commodity, because the products are interchangeable, competition between the manufacturers is based on price.

37. Generic competition usually enables purchasers to (a) purchase generic versions of the brand name drug at a substantially lower price than the brand name drug, and/or (b) purchase the brand name drug at a reduced price. Generic competition to a single branded drug product can result in billions of dollars in savings to consumers, insurers, and other drug purchasers.

38. Drug companies that want to introduce a generic drug to the market file an Abbreviated New Drug Application (“ANDA”) with the FDA’s Center for Drug Evaluation and Research, Office of Generic Drugs. The filing is called “abbreviated” because the ANDA sponsor references data submitted in the approval of the Reference Listed Drug (“RLD”) (the

⁶ See, e.g., Ernst R. Berndt, et al., *Authorized Generic Drugs, Price Competition, And Consumers’ Welfare*, Health Affairs 26, no. 3 (2007):790-799.

brand name drug). “By designating a single reference listed drug as the standard to which all generic versions must be shown to be bioequivalent, FDA hopes to avoid possible significant variations among generic drugs and their brand name counterpart.”⁷ An ANDA sponsor is generally not required to include clinical trial data to establish the safety and efficacy of the drug. Instead, a generic drug company must show that its generic product is “bioequivalent” to the name brand drug,⁸ i.e., the generic product and the brand RLD have the same (i) active ingredient, (ii) maximum amount of drug in the blood at a given time, (iii) total amount of drug in the blood over time, (iv) strength, dosage, dosage form, (v) expected safety and efficacy, and (vi) FDA approval of manufacturing facilities. Upon the FDA’s determination that bioequivalence has been established, the ANDA applicant may manufacture and market its generic drug in the U.S. as interchangeable with the RLD.

39. Generic drugs that are bioequivalent to an RLD are assigned a Therapeutic Equivalence Code (“TE Code”).⁹ An oral generic drug product will be coded “AB” if bioequivalence is demonstrated. The purpose of this coding is to allow users to determine whether the FDA has evaluated a particular approved product as therapeutically equivalent to other pharmaceutically equivalent products and to provide information on the basis of the FDA’s evaluations.¹⁰

B. Consolidation in the Generic Drug Industry

40. Since 2005, consolidations in the generic drug industry have affected control of product supply and pricing for consumers.

⁷ <http://www.fda.gov/Drugs/InformationOnDrugs/ucm079436.htm#RLD>.

⁸ <http://www.fda.gov/Drugs/InformationOnDrugs/ucm079436.htm#A>.

⁹ <http://www.fda.gov/Drugs/InformationOnDrugs/ucm079436.htm#T>.

¹⁰ <http://www.fda.gov/Drugs/InformationOnDrugs/ucm079436.htm>.

41. For example, Teva Pharmaceutical Industries Ltd. acquired Ivax Corporation for \$7.4 billion in 2006; Barr Laboratories for \$7.4 billion in 2008; Ratiopharm, Germany's second largest generic drug producer, for \$5 billion in 2010, and agreed to acquire Allergan Generics in 2015 for \$40.5 billion. Watson Pharmaceuticals acquired Andrx Corporation in 2006 for \$1.9 billion; Daiichi Sankyo acquired a majority stake in Ranbaxy in 2008; and Endo Pharmaceuticals acquired Qualitest for \$1.2 billion in 2010.

42. Consolidation in the generic drug industry has led to higher prices for consumers and the combining or discontinuation of generic product lines, which contributed to reducing price competition. Mergers within the generic drug industry were a reaction, in part, to the consolidation of distributors. Generic manufacturers then had leverage to charge higher prices if distributors were unable to negotiate lower prices with other generic manufacturers offering therapeutically equivalent drugs.

C. Opportunities for Collusion

43. The DOJ is reportedly examining trade associations where Defendants allegedly have opportunities to communicate and collude, such as the Generic Pharmaceutical Association's ("GPhA"). According to an intelligence report from the *Policy and Regulatory Report* ("PaRR"), a source that was given inside information by someone with knowledge of the government's generic pricing investigation, the DOJ is looking closely "at trade associations as part of their investigation as having been one potential avenue for facilitating the collusion between salespeople at different generic producers."¹¹

¹¹ <http://www.fiercepharma.com/story/actavis-gets-subpoena-doj-probe-generic-pricing-moves-food-chain/2015-08-07>.

44. The GPhA is the “leading trade association for generic drug manufacturers and distributors, manufacturers of bulk active pharmaceutical chemicals, and suppliers of other goods and services to the generic industry.” GPhA was formed in 2000 from the merger of three industry trade associations: GPhA, the National Association of Pharmaceutical Manufacturers, and the National Pharmaceutical Alliance.¹²

45. Defendants Teva and Apotex have representatives on GPhA’s 2016 Board of Directors. An executive of Mylan N.V. was the 2016 GPhA Chair of the Board of Directors.

46. According to GPhA’s website, “GPhA member companies supply approximately 90 percent of the generic prescription drugs dispensed in the U.S. each year.” GPhA states that, “[b]y becoming part of GPhA, you can participate in shaping the policies that govern the generic industry and help secure the future of this vital pharmaceutical market segment. In addition, GPhA provides valuable membership services, such as business networking opportunities, educational forums, access to lawmakers and regulators, and peer-to-peer connections.”¹³

47. Generic drug manufacturers attend meetings and industry trade shows throughout the year, including those hosted by the GPhA, National Association of Chain Drug Stores, Healthcare Distribution Management Association (now the Healthcare Distribution Alliance), and Efficient Collaborative Retail Marketing.¹⁴

¹² In February 2017, the GPhA changed its name to the Association for Accessible Medicines (“AAM”). See Russell Redman, *New name for Generic Pharmaceutical Association*, CHAIN DRUG REVIEW (Feb. 14, 2017), available at <http://www.chaindrugreview.com/new-name-for-generic-pharmaceutical-association/>.

¹³ <http://www.gphaonline.org/about/membership>.

¹⁴ See AG Complaint at ¶ 50.

48. At these meetings and trade shows, generic drug manufacturers have opportunities to discuss and share competitively sensitive information, such as pricing, upcoming bids, and customer contracts.¹⁵

49. Many of these conferences and trade shows also include organized recreational and social events, such as golf outings, lunches, cocktail parties, dinners, and other scheduled activities that provide further opportunity to meet with competitors.

50. High-level executives of generic drug manufacturers meet periodically at industry dinners. For example, in January 2014, when certain generic drug prices were increasing exponentially, at least thirteen (13) high-ranking male executives of various generic drug manufacturers met at a steakhouse in Bridgewater, New Jersey.¹⁶

51. Female sales representatives for generic drug manufacturers regularly hold meetings and dinners for “Girls Night Out” (“GNO”) and Women in the Industry events, where competitively sensitive information is discussed.¹⁷ For example, GNOs were held at the ECRM conference in February 2015, in Baltimore in May 2015, and at the NACDS conference in August 2015.¹⁸

52. Many generic drug manufacturers, including two of the Defendants, have offices in close proximity to one another in New Jersey, eastern Pennsylvania, or New York, providing them with more opportunities to meet and collude.

D. Generic Pravastatin Market and Pricing Information

¹⁵ *Id.* at ¶ 51.

¹⁶ *Id.* at ¶ 55.

¹⁷ *Id.* at ¶ 57.

¹⁸ *Id.* at ¶ 60.

53. Generic Pravastatin is a “statin” drug prescribed to lower cholesterol levels in patients with an increased risk of atherosclerosis-related cardiac and cardiovascular events, such as heart attack and stroke. Statin drugs or “statins”, also known as HMG-CoA reductase inhibitors, work by blocking a liver enzyme that is responsible for producing cholesterol. Statins lower LDL cholesterol and total cholesterol levels, as well as assist in lowering triglycerides and raising HDL, or good cholesterol, levels. A build-up of cholesterol can result in narrowed or hardened arteries. Some patients who take a statin drug may have their risk of heart attack, stroke, or death from heart disease reduced by 25-35%.

54. Statins were developed in the 1970s and 1980s, and statins approved for use in the U.S. include Pravastatin (brand name version is Pravachol), as well as atorvastatin (brand name version is Lipitor), fluvastatin (brand name versions are Lescol, Lescol XL), lovastatin (brand name versions are Mevacor, Altoprev), rosuvastatin (brand name version is Crestor), simvastatin (brand name version is Zocor), and pitavastatin (brand name version is Livalo). While these drugs are classified as statins, the drugs differ in metabolism, pharmacokinetics, potency, and approved indications. These differences prevent them from being substitutable with each other at the pharmacy level.

55. Pravastatin has been available in the United States since 1991 and became available in generic form in 2006. In 1989, Sankyo launched Pravastatin in Japan as one of the first statins on the market. Bristol-Myers Squibb Co. (“BMS”) obtained the right to market and sell the drug outside Japan and filed an NDA with the FDA to sell Pravastatin in the U.S. BMS marketed the drug under the brand name Pravachol, which was approved by the FDA and entered the U.S. market in 1991.

56. Pravachol became a blockbuster drug due to its effectiveness, lack of side effects, and the large numbers of patients needing high cholesterol treatment. Pravachol sales peaked at \$2.8 billion worldwide in 2003.¹⁹ Pravachol was the 22nd best-selling drug in the U.S. market in 2005 with sales of \$1.3 billion.²⁰

57. Patent exclusivity for Pravachol expired in 2006, and BMS noted in its annual report that it expected to lose significant sales to generic Pravastatin. Due to patent expiration, generic Pravastatin entered the market in 2006, Pravachol sales dropped 53%, and BMS's net sales dropped 7%.²¹

58. Teva entered the market as the first generic manufacturer of Pravastatin and had a 180-day exclusivity period as the first generic manufacturer to file an ANDA and challenge BMS's patents. Teva's net sales increased from \$5.25 billion in 2005 to \$8.41 billion in 2006, largely as a result of sales in the U.S. of generic Pravastatin and another statin, simvastatin.

59. During Teva's 180-day exclusivity, the average price of generic Pravastatin was around \$90 for a thirty day supply, while Pravachol's average price for only a seven day supply was \$136,²² (or 3 cents per pill generic versus 19.4 cents per pill for brand product).

60. After other generic manufacturers entered the market by 2012, the price for generic Pravastatin fell to \$36 for a thirty day supply.²³

¹⁹ See Bristol-Myers Squibb Co., Form 10-K at page 5, for fiscal year ending December 31, 2003.

²⁰ <http://www.fda.gov/NewsEvents/Newsroom/PressAnnouncements/2006/ucm108644.htm>

²¹ See Bristol-Myers Squibb Co., Form 10-K at page 4, for fiscal year ending December 31, 2006.

²² Findlay, Steven, *The Statin Drugs, Prescription and Price Trends, October 2005 to December 2006*, CONSUMER REPORTS BEST BUY DRUGS, page 8 (February 2007).

61. The drop in prices was typical under the Hatch-Waxman Act framework as the loss of BMS's patent protection and the expiration of Teva's 180-day exclusivity period should result in a significant reduction in the price of generic Pravastatin.

62. Then, in mid-2013, in an abrupt change in the usual industry pricing dynamics, the price of pravastatin dramatically rose from \$0.11 per pill to \$0.56 per pill. Pravastatin prices increased sharply and without justification. From July 2013 to January 2014, Defendants collectively imposed price increases for generic Pravastatin by 573%. Yet, in 2013, Pravastatin had the third highest market share based on prescriptions for HMG-CoA reductase inhibitors in the U.S. (14.5%, compared to atorvastatin at 31% and simvastatin at 36.4%).

63. Defendants substantially increased the price of Pravastatin in unison as a result of an agreement among Defendants to increase pricing and restrain competition for the sale of Pravastatin in the U.S.

64. The agreement was furthered by discussions at several GPhA meetings in Orlando, Florida and North Bethesda, Maryland that took place between October 2012 and June 2013. The meetings were attended by executives from the Defendants. Throughout the Class Period, Defendants' executives regularly attended meetings and events sponsored by the GPhA. Prior to June 2013, the average price in the U.S. paid for Pravastatin was stable. In August 2013, following the June GPhA meeting, Defendants collectively raised Pravastatin prices as follows:²⁴

²³ *Evaluating Drugs to Treat High Cholesterol and Heart Disease*, CONSUMER REPORTS BEST BUY DRUGS, page 12 (April 2012, updated March 2014).

²⁴ GAO, Report of Congressional Requesters, *Generic Drugs Under Medicare: Part D Generic Drug prices Declined overall, but Some Had Extraordinary Price Increases* (Aug. 2016), available at <http://www.gao.gov/products/GAO-16-706>.

- a. **Pravastatin 10 mg:** National Drug Acquisition Cost (“NADAC”) data demonstrates that between June 2013 and December 2013, the average price for 10 mg Pravastatin increased by 615%.

- b. **Pravastatin 20 mg:** NADAC data demonstrates that between June 2013 and February 2014, the average price for 20 mg Pravastatin increased by 539%.

c. **Pravastatin 40 mg:** NADAC data demonstrates that between June 2013 and December 2013, the average price for 40 mg Pravastatin increased by 624%.

d. **Pravastatin 80 mg:** NADAC data demonstrates that between June 2013 and January 2014, the average price for 80 mg Pravastatin increased by 210%.

65. Prices for generic Pravastatin increased without justification and in a departure from the usual industry practices. The cost or availability of raw materials does not justify the price increase. As generic manufacturers, Defendants did not incur the same costs, such as research and development, as brand drug manufacturers in bringing their generic Pravastatin products to market. The increased prices were not associated with any related increase in manufacturing costs.

66. At all times during the class period, there were at least three or more separate manufacturers of generic Pravastatin. The active ingredient for the drug product, pravastatin has nine approved holders of active Drug Master Files (“DMF”),²⁵ starting in 1998 (Daiichi Sankyo), and one new DMF holder approved in 2013, meaning there are nine approved manufacturers of the pravastatin used in the finished dosage form.

67. Drug shortage reports for the time period do not list pravastatin as being in short supply.²⁶

68. Under the well-accepted economics of generic competition, when there are that many generic versions of a drug available, all of which by definition are equally substitutable, prices should remain at highly competitive, historic levels, and would not increase as they did here, absent anticompetitive conduct.

²⁵ A Drug Master File, or DMF, is a regulatory document that contains the complete information for an active pharmaceutical ingredient (or API or drug substance), or a finished dosage form (the complete drug product, such as a tablet). The DMF contains information on the drug manufacture, stability, purity, chemistry, packaging and the good manufacturing practices that were used in the processes to make the product that is the subject of the DMF.

²⁶ See FDA Drug Shortages website, <http://www.accessdata.fda.gov/scripts/drugshortages/default.cfm#P>; American Society of Health-System Pharmacists, <http://www.ashp.org/shortages>.

69. Because there were no justifications such as supply shortages attributable to higher raw material costs, raw material shortages, or manufacturing bottlenecks (such as too few manufacturers to satisfy demand), competition among generic manufacturers of Pravastatin should have resulted in lower prices. Instead, prices increased after the Defendants met and unlawfully colluded to raise prices.

E. Government Investigations of Generic Drug Industry

70. As noted above, Defendants' conduct in generic pharmaceutical pricing is the subject of federal government investigations by the U.S. Senate and DOJ, as well as state government investigations.

71. On October 2, 2014, U.S. Senator Bernie Sanders and U.S. Representative Elijah E. Cummings sent letters to fourteen drug manufacturers, including Defendants Teva, Mylan, Dr. Reddy's, Zydus and Apotex, seeking information relating to the escalating prices of generic drugs (the "October Letters") and noting the average 573% price increase for Pravastatin between October 2013 and April 2014.

72. The October Letters to Defendants Teva, Mylan, Dr. Reddy's, Zydus and Apotex, state the following:

This dramatic increase in generic prices results in decreased access for patients. According to the National Community Pharmacists Association (NCPA), a 2013 member survey found that pharmacists across the country "have seen huge upswings in generic drug prices that are hurting patients and pharmacies ability to operate" and "77% of pharmacists reported 26 or more instances over the past six months of a large upswing in a generic drug's acquisition price." These price increases have a direct impact on patients' ability to purchase their needed medications. The NCPA survey found that "pharmacists reported patients declining their medication due to increased co-pays..."²⁷

²⁷ See, e.g., Letter from Senator Sanders and Representative Cummings to Erez Vigodman, President and CEO, Teva Pharmaceutical Industries Ltd., October 2, 2014, available at <http://www.sanders.senate.gov/download/letter-to-mr-vigodman-president-and-ceo-teva-pharmaceutical-industries-ltd?inline=file>.

73. The October Letters to Defendants Teva, Mylan, Dr. Reddy's, Zydus and Apotex requested documents and information from 2012 to the present, including,

- (1) total gross revenues from the companies' sales of these drugs;
- (2) the dates, quantities, purchasers and prices paid for all sales of these drugs;
- (3) total expenses relating to the sales of these drugs, as well as the specific amounts for manufacturing, marketing and advertising, and purchases of active pharmaceutical ingredients, if applicable;
- (4) sales contracts or purchase agreements for active pharmaceutical ingredients for these drugs, including any agreements relating to exclusivity, if applicable;
- (5) a description and valuation of the specific financial and non-financial factors that contributed to your company's decisions to increase the prices of these drugs;
- (6) any cost estimates, profit projections, or other analyses relating to the company's current and future sales of these drugs;
- (7) prices of these drugs in all foreign countries or markets, including price information for the countries paying the highest and lowest prices; and
- (8) the identity of company official(s) responsible for setting the price of these drugs over the above time period.²⁸

74. The October Letters were accompanied by a press release by Senator Sanders and Congressman Cummings, which stated,

"We are conducting an investigation into the recent staggering price increases for generic drugs used to treat everything from common medical conditions to life-threatening illnesses," Sanders, chairman of a Senate health care subcommittee, and Cummings, ranking member of the House oversight committee, wrote in letters to 14 pharmaceutical companies.

...

²⁸ *Id.* at page 3 (referring to documents and information relating to Divalproex Sodium ER and Pravastatin Sodium).

Cummings and Sanders cited a survey that found pharmacies across the country “have seen huge upswings in generic drug prices that are hurting patients” and having a “very significant” impact on pharmacists’ ability to continue serving patients. The study for the National Community Pharmacists Association also found some patients refused to fill needed prescriptions because of rising prices.

“It is unacceptable that Americans pay, by far, the highest prices in the world for prescription drugs. Generic drugs were meant to help make medications affordable for the millions of Americans who rely on prescriptions to manage their health needs. We’ve got to get to the bottom of these enormous price increases,” Sanders said.

“When you see how much the prices of these drugs have increased just over the past year, it’s staggering, and we want to know why,” said Cummings. “I am very pleased that Chairman Sanders has joined me in this bicameral investigation because in some cases these outrageous price hikes are preventing patients from getting the drugs they need.”²⁹

75. The U.S. Senate HELP Committee held a hearing on November 20, 2014, “Why Are Some Generic Drugs Skyrocketing in Price?”³⁰

76. During the Senate Hearing on generic drug prices, pharmacist Rob Frankil testified on November 20, 2014 that, “it was extremely concerning when about a year ago, pharmacies began noticing a rash of dramatic price increases for many common, previously low-cost generic drugs.”³¹ Pravastatin was cited as one of the drugs with a sudden price increase, which impacted patients’ ability to afford the drug and pharmacies’ ability to operate their businesses. A patient testified that with respect to Pravastatin, “earlier this year, my \$4-a-month prescription suddenly cost me \$18.73. That’s with health insurance. I asked about the increase

²⁹ Press release, Congress Investigating Why Generic Drug Prices are Skyrocketing, Oct. 2, 2014, available at <http://www.sanders.senate.gov/newsroom/press-releases/congress-investigating-why-generic-drug-prices-are-skyrocketing>.

³⁰ <http://www.sanders.senate.gov/newsroom/press-releases/drugmakers-mum-on-huge-price-hikes>.

³¹ <http://www.help.senate.gov/imo/media/doc/Frankil.pdf>.

and the Target pharmacist had no explanation.” Teva’s President and CEO, Erez Vigodman, was invited to attend the hearing but did not do so.

77. On February 24, 2015, Senator Sanders and Congressman Cummings sent a letter to the Office of the Inspector General (“OIG”) of the Department of Health and Human Services asking that the OIG “examine recent increases in the prices being charged for generic drugs and the effect these price increases have had on generic drug spending within the Medicare and Medicaid programs.”³² The OIG responded to the request on April 13, 2015 and stated that it planned to review quarterly average manufacturer prices [“AMPs”] for the top 200 generic drugs from 2005 through 2014, and would “determine the extent to which the quarterly AMPs exceeded the specified inflation factor.”³³ The OIG concluded that escalating generic drug prices have cost taxpayers \$1.4 billion in overpayment by Medicaid.³⁴ In a 2015 budget deal by Congress, legislation requires generic drug manufacturers to pay back the Medicaid program when their prices rise faster than inflation. Later in 2015, Senator Sanders and Representative Cummings proposed comprehensive legislation to address prescription drugs prices.

78. Subsequent congressional hearings concerning the dramatic rise of generic pharmaceutical prices were held in December 2015 and February 2016. At the U.S. Senate Special Committee on Aging’s December 9, 2015 hearing, Erin D. Fox, the Director of the Drug Information Service of the University of Utah, noted the deleterious effect these drug prices have had on patient access and healthcare, stating that “[w]hen medication prices increase in an

³² <http://www.sanders.senate.gov/download/sanders-cummings-letter?inline=file>.

³³ <http://www.sanders.senate.gov/download/oig-letter-to-sen-sanders-4-13-2015?inline=file>.

³⁴ Office of the Inspector General, Average Manufacture Prices increased faster than Inflation for Many Generic Drugs, December 2015, available at <https://oig.hhs.gov/oas/reports/region6/61500030.pdf>.

unpredictable and dramatic way, this can create an access issue for hospitals and patients. If hospitals cannot afford to stock a product in the same amount due to price increases, this effectively creates a shortage.”

79. The DOJ is conducting an ongoing investigation into generic drug pricing. Several leading generic drug manufacturers have been subpoenaed for information, documents and testimony relating to “communication or correspondence with any competitor in the sale of generic prescription medications.”³⁵ Grand jury subpoenas have been issued to Defendants Mylan, Actavis and Dr. Reddy’s. For example, Mylan was subpoenaed in December 2015 concerning its “marketing, pricing and sale” of generic doxycycline. The most recent of the subpoenas was issued in May 2016. Some of the subpoenas appear to request information relating to Pravastatin.

80. The fact that a grand jury subpoena was served on Defendant Mylan is indicative that it has potentially violated antitrust law. According to the DOJ’s *Antitrust Division Manual*, “staff should consider carefully the likelihood that, if a grand jury investigation developed evidence confirming the alleged anticompetitive conduct, the Division would proceed with a criminal prosecution.”³⁶ If a grand jury request memorandum is approved by the DOJ field office chief, “a grand jury request should be emailed to the ATR-CRIM-ENF [Antitrust Criminal Enforcement Division].”³⁷ “The DAAG [Deputy Assistant Attorney General] for Operations, the Criminal DAAG, and the Director of Criminal Enforcement will make a recommendation to the Assistant Attorney General. If approved by the Assistant Attorney General, letters of authority

³⁶ See *Antitrust Division Manual*, Chapter III, Section F.1 at III-82 (2015).

³⁷ *Id.*

5. Does a leniency applicant have to admit to a criminal violation of the antitrust laws before receiving a conditional leniency letter?

Yes. The Division's leniency policies were established for corporations and individuals "reporting their illegal antitrust activity," and the policies protect leniency recipients from criminal conviction. Thus, the applicant must admit its participation in a criminal antitrust violation involving price fixing, bid rigging, capacity restriction, or allocation of markets, customers, or sales or production volumes before it will receive a conditional leniency letter. Applicants that have not engaged in criminal violations of the antitrust laws have no need to receive leniency protection from a criminal violation and will receive no benefit from the leniency program.⁴¹

84. The DOJ further provides that the leniency applicant must also satisfy the following condition, among others, to avail itself of the government's leniency: "[t]he confession of wrongdoing is truly a corporate act, as opposed to isolated confessions of individual executives or officials."⁴²

85. DOJ and state government investigations of Defendants' alleged price-fixing conduct in the generic pharmaceutical industry continue.

F. Order Denying Motion to Dismiss in *Propranolol Antitrust Litigation*

86. In another generic drug price-fixing case, *In re: Propranolol Antitrust Litigation*, the U.S. District Court for the Southern District of New York entered an Opinion and Order on April 6, 2017 denying a motion to dismiss direct purchasers' consolidated amended complaint. *See In re Propranolol Antitrust Litig.*, No. 16-cv-9901, -- F.3d --, 2017 WL 1287515 (S.D.N.Y. Apr. 6, 2017) (Rakoff, J.) ("Propranolol Order").⁴³ Plaintiffs in the *Propranolol* case alleged a

⁴¹ Frequently Asked Questions Regarding the Antitrust Division's Leniency Program, Dept. of Justice (last visited Jan. 24, 2017), *available at* <http://www.justice.gov/atr/frequently-asked-questions-regarding-antitrust-divisions-leniency-program>

⁴² *Id.*

⁴³ The *Propranolol* defendants are Actavis Elizabeth, LLC, Teva Pharmaceuticals USA, Inc., Pliva, Inc., Mylan Inc., Mylan Pharmaceuticals, Inc., UDL Laboratories, Inc., Par

conspiracy among generic manufacturers to manipulate the market for generic propranolol, with facts similar to those alleged herein for the generic Pravastatin market. Several defendants in the *Propranolol* case are named as defendants in this complaint.

87. In denying the defendants' motion to dismiss, Judge Rakoff found that *Propranolol* plaintiffs pled a plausible price-fixing conspiracy and that plaintiffs alleged market specific factors suggesting that defendants had an incentive to manipulate prices. *See* Propranolol Order at 11, 13, 24. Judge Rakoff noted that Plaintiffs' pleadings "set forth in detail a regulatory regime that has historically pushed the price of Propranolol downwards and gradually reduced defendants' profits, thereby giving them a common motive to conspire." *Id.* at 13. Further, Judge Rakoff found that plaintiffs' pleadings "allege a pattern of price fixing spanning several years and no clear mechanism through which the defendants could legitimately and consistently monitor each other's pricing activity." *Id.* at 15-16.

88. The *Propranolol* plaintiffs alleged the presence of four plus factors to plausibly establish that the defendants conspired to fix prices of Propranolol capsules and tablets in 2013 and 2015: "(1) defendants had a motive to increase prices because they operate in an oligopolistic market characterized by falling prices; (2) the price increases were against defendants' self-interest because in a competitive market, defendants should have tried to undercut each other's prices to increase their market share; (3) defendants frequently communicated at trade association meetings; and (4) there are ongoing state and federal investigations for price manipulation of generic drugs, including Propranolol." *Id.* at 10-11, 24.

89. As alleged herein, the same plus factors exist in the market for Pravastatin.

Pharmaceutical, Inc., Heritage Pharmaceuticals Inc., Breckenridge Pharmaceutical, Inc., and Upsher-Smith Laboratories, Inc.

90. Judge Rakoff rejected defendants' explanations for Propranolol price increases. For example, "plaintiffs plausibly allege that because the FDA did not report a shortage of Propranolol capsules following Mylan's exit, there was no 'shift' in the total supply of Propranolol that would rationally increase prices." *Id.* at 17. In addition, "while it is true that defendants' price increases did not always align on a monthly basis, defendants consistently raised prices on a bi-monthly and quarterly basis, which is consistent with an illegal agreement." *Id.* (emphasis in original). Similar price increases for Pravastatin are shown in this complaint. *See infra.*

G. *In re: Generic Pharmaceuticals Pricing Antitrust Litigation*

91. On April 6, 2017, the U.S. Judicial Panel on Multidistrict Litigation entered a Transfer Order granting Rochester Drug Cooperative, Inc.'s motion to transfer ten generic drug price-fixing actions to the Eastern District of Pennsylvania for inclusion in *In re: Generic Digoxin and Doxycycline Antitrust Litigation*, MDL No. 2724 (E.D. Pa.). The MDL was renamed *In re: Generic Pharmaceuticals Pricing Antitrust Litigation* and now includes price-fixing allegations for eighteen generic drugs: (1) Doxycycline, (2) Digoxin, (3) Albuterol, (4) Clomipramine, (5) Desonide, (6) Pravastatin, (7) Divalproex, (8) Benazepril HCTZ, (9) Levothyroxine, (10) Propranolol, (11) Baclofen, (12) Glyburide, (13) Ursodiol, (14) Amitriptyline, (15) Lidocaine/Prilocaine, (16) Clobetasol, (17) Fluocinonide, and (18) Econazole.

92. This case has been filed as a related case to *In re Generic Pharmaceuticals Pricing Antitrust Litigation*, MDL No. 2724.

VII. THE GENERIC DRUG MARKET IS HIGHLY SUSCEPTIBLE TO COLLUSION

93. The factors necessary to show that a market is susceptible to collusion are present in this case:

- (1) **High Degree of Industry Concentration** – As discussed above, a small number of competitors control a significant market share for generic Pravastatin. The Pravastatin market is highly concentrated and dominated by Defendants.
- (2) **Barriers to Entry** – Costs of manufacture, intellectual property, and expenses related to regulatory oversight are barriers to entry in the generic drug market. Barriers to entry increase the market's susceptibility to a coordinated effort among the dominant entities in the generic drug industry to maintain supra-competitive prices.
- (3) **Demand Inelasticity** – Generic Pravastatin is necessary treatment for millions of patients. Demand is inelastic if an increase in price results in a relatively small decline in demand for the product. Demand is inelastic for products such as Pravastatin because consumers cannot readily substitute alternative products.
- (4) **Lack of Substitutes** – Some patients are unable to substitute other medications for generic Pravastatin. Generic Pravastatin is prescribed to lower cholesterol levels in patients with an increased risk of heart attack and stroke. Large numbers of patients need high cholesterol treatment.
- (5) **High Degree of Interchangeability** – Defendants' generic Pravastatin products are interchangeable as they contain the same chemical compounds made from the same raw materials. Thus, generic Pravastatin is standardized across suppliers and is highly interchangeable from one Defendant to the next.
- (6) **Absence of Competitive Sellers** – Defendants have maintained supracompetitive pricing for generic Pravastatin throughout the Class Period. Defendants have oligopolistic market power in the generic Pravastatin market, which enables Defendants to increase prices without losing market share to non-conspirators.
- (7) **Opportunities for Contact and Communication Among Competitors** – As discussed above, certain Defendants are members of trade association GPhA which provides and promotes opportunities to communicate.

94. Defendants' dominant market power has allowed them to substantially foreclose the market to rival competition, thereby impairing competition, maintaining and enhancing market power, and enabling Defendants to charge Plaintiff and the Class Members inflated prices above competitive levels for generic Pravastatin.

VIII. CLASS ACTION ALLEGATIONS

95. Pursuant to Federal Rules of Civil Procedure 23(a), (b)(2) and (b)(3), Plaintiff brings this action on behalf of a class defined as follows:

All persons or entities that directly purchased Pravastatin from Defendants in the United States and its territories and possessions at any time during the period July 1, 2013 through the present (the "Class Period").

Excluded from the Direct Purchaser Class are Defendants and their officers, directors, management, employees, subsidiaries, or affiliates, and all governmental entities.

96. Members of the Class are so numerous that joinder is impracticable. Plaintiff believes that there are hundreds of Class Members, geographically dispersed throughout the United States such that joinder of all Class Members is impracticable. Further, the Class is readily identifiable from information and records maintained by Defendants

97. Plaintiff's claims are typical of the claims of the members of the Class. Plaintiff's interests are not antagonistic to the claims of the other Class members, and there are no material conflicts with any other member of the Class that would make class certification inappropriate. Plaintiff and all members of the Class were damaged by the same wrongful conduct of Defendants.

98. Plaintiff will fairly and adequately protect and represent the interests of the Class. The interests of the Plaintiff are coincident with, and not antagonistic to, those of the Class.

99. Plaintiff is represented by counsel who are experienced and competent in the prosecution of class action litigation, and who have particular experience with class action litigation involving alleged violations of antitrust law.

100. Questions of law and fact common to the members of the Class predominate over questions that may affect only individual Class members because Defendants have acted on grounds generally applicable to the entire Class, thereby determining damages with respect to the

Class as a whole is appropriate. Such generally applicable conduct is inherent in Defendants' wrongful conduct.

101. The common legal and factual questions, which do not vary from Class member to Class member and which may be determined without reference to individual circumstances of any Class member, include, but are not limited to, the following:

- (a) Whether Defendants and their co-conspirators engaged in a contract, combination, or conspiracy to eliminate competition and thereby artificially increase the prices of generic Pravastatin in the United States;
- (b) The duration and extent of the alleged contract, combination, or conspiracy;
- (c) Whether Defendants and their co-conspirators were participants in the contract, combination, or conspiracy alleged herein;
- (d) The effect of the contract, combination, or conspiracy on the prices of generic Pravastatin in the United States during the Class Period;
- (e) Whether Defendants' conduct caused supracompetitive prices for generic Pravastatin;
- (f) Whether, and to what extent, the conduct of Defendants and their co-conspirators caused injury to Plaintiff and other members of the Class; and
- (g) Whether the alleged contract, combination, or conspiracy violated Section 1 of the Sherman Act, 15 U.S.C. § 1.

102. Class action treatment is a superior method for the fair and efficient adjudication of the controversy. Such treatment will permit a large number of similarly situated persons or entities to prosecute their common claims in a single forum simultaneously, efficiently, and without the unnecessary duplication of evidence, effort, or expense that numerous individual actions would engender. The benefits of proceeding through the class mechanism, including providing injured persons or entities a method for obtaining redress on claims that could not practicably be pursued individually, substantially outweighs potential difficulties in management of this class action.

103. Plaintiff knows of no special difficulty to be encountered in the maintenance of this action that would preclude its maintenance as a class action.

IX. INTERSTATE TRADE AND COMMERCE

104. During the Class Period, Defendants, directly or through one or more of their affiliates, sold Pravastatin throughout the United States in a continuous and uninterrupted flow of interstate commerce, including through and into this District.

105. The business activities of Defendants that are the subject of this action were within the flow of, and substantially affected, interstate trade and commerce.

106. Defendants' and their co-conspirators' conduct, including the marketing and sale of Pravastatin, took place within, has had, and was intended to have, a direct, substantial, and reasonably foreseeable anticompetitive effect upon interstate commerce within the United States.

107. The conspiracy alleged in this Complaint has directly and substantially affected interstate commerce as Defendants deprived Plaintiff of the benefits of free and open competition in the purchase of Pravastatin within the United States.

108. Defendants' agreement to inflate, fix, raise, maintain, or artificially stabilize prices of Pravastatin, and their actual inflating, fixing, raising, maintaining, or artificially stabilizing Pravastatin prices, were intended to have, and had, a direct, substantial, and reasonably foreseeable effect on interstate commerce within the United States and on import trade and commerce with foreign nations.

X. DEFENDANTS' ANTITRUST VIOLATIONS

109. Defendants' combination and conspiracy had the following anticompetitive effects in the market for generic Pravastatin:

- (a) Competition in the market for generic Pravastatin has been reduced;

(b) Prices for generic Pravastatin have increased and have not followed the typical pricing patterns of generic drugs over time; and

(c) U.S. purchasers have been deprived of the benefit of price competition in the market for generic Pravastatin.

110. During the Class Period, Plaintiff and Class Members directly purchased generic Pravastatin from Defendants. As a result of the Defendants' anticompetitive conduct, Plaintiff and Class Members paid more for generic Pravastatin than they would have and thus suffered substantial damages. This is a cognizable antitrust injury and constitutes harm to competition under the federal antitrust laws.

111. Because Defendants' unlawful conduct has successfully eliminated competition in the market, and Plaintiff and Class Members have sustained, and continue to sustain, significant losses in the form of artificially inflated prices paid to Defendants. The full amount of such damages will be calculated after discovery and upon proof at trial.

112. Defendants' misconduct reduced competition in the generic Pravastatin market, reduced choice for purchasers, and caused injury to purchasers.

113. Defendants' anticompetitive conduct is ongoing, and as a result Plaintiff and the Class continue to pay supracompetitive prices for generic Pravastatin.

XI. CLAIM FOR RELIEF

VIOLATION OF SECTION 1 OF THE SHERMAN ACT, 15 U.S.C. § 1

114. Plaintiff incorporates and re-alleges, as though fully set forth herein, each of the paragraphs set forth above.

115. Defendants and their co-conspirators entered into, and engaged in, a contract, combination, or conspiracy in unreasonable restraint of trade in violation of Section 1 of the Sherman Act, 15 U.S.C. § 1.

116. Defendants are *per se* liable under Section 1 of the Sherman Act, 15 U.S.C. § 1, for the injuries and damages caused by their contract, combination, and conspiracy in restraint of trade as alleged herein.

117. Defendants' anticompetitive acts were intentional, were directed at the sales of Pravastatin in the United States, and had a substantial and foreseeable effect on interstate commerce by raising and fixing Pravastatin prices throughout the United States.

118. In formulating and effectuating their combination or conspiracy, Defendants and their co-conspirators engaged in anticompetitive activities, the purpose and effect of which were to artificially fix, raise, maintain and/or stabilize the prices of generic Pravastatin, including: (1) participating in meetings to discuss their respective generic drug products; (2) agreeing to coordinate and manipulate the prices and available supply of generic Pravastatin in a manner that deprived purchasers in the U.S. of price competition; and (3) providing pretextual justifications to purchasers and the public to explain any raises, maintenance or stabilization of the prices for Defendants' generic Pravastatin.

119. The contract, combination, or conspiracy had the following direct, substantial, and reasonably foreseeable effects upon commerce in the United States:

- a. Prices charged to, and paid by, Plaintiff for Pravastatin were artificially raised, fixed, maintained, or stabilized at supra-competitive levels;
- b. Plaintiff was deprived of the benefits of free, open, and unrestricted competition in the sale of Pravastatin in the United States market; and

- c. Competition in establishing the prices paid for Pravastatin was unlawfully restrained, suppressed, or eliminated.

120. There is no legitimate, non-pretextual, procompetitive business justification for Defendants' conspiracy that outweighs its harmful effect. Even if there were some conceivable justification, the conspiracy is broader than necessary to achieve such a purpose.

121. As set forth above, in violation of Section 1 of the Sherman Antitrust Act, Defendants entered into agreements with one another on the pricing of generic Pravastatin in the U.S. This conspiracy was *per se* unlawful price-fixing, or alternatively, was an unlawful restraint of trade under the rule of reason.

122. Each Defendant has committed at least one overt act to further the conspiracy alleged in this Complaint.

123. The conspiracy had its intended effect, as Defendants benefited from their collusion and the elimination of competition, both of which artificially inflated the prices of generic Pravastatin, as described herein.

124. As a result of Defendants' unlawful conduct, Plaintiff and Class Members have been injured in their business and property in that they have paid more for generic Pravastatin than they otherwise would have paid in the absence of Defendants' unlawful conduct. The full amount of such damages is presently unknown but will be determined after discovery and upon proof at trial.

125. Defendants' unlawful conduct as alleged herein poses a significant, continuing threat of antitrust injury for which injunctive relief is appropriate under Section 16 of the Clayton Act.

XII. PRAYER FOR RELIEF

WHEREFORE, Plaintiff and Class Members pray for relief as set forth below:

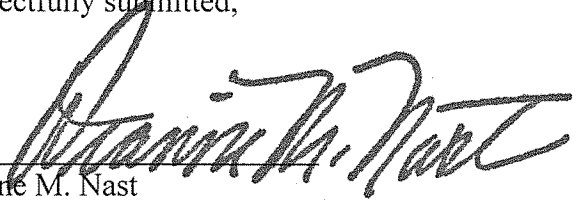

- A. Certification of the action as a Class Action pursuant to Federal Rule of Civil Procedure 23, and appointment of Plaintiff as Class Representative and its counsel of record as Class Counsel;
- B. Permanent injunctive relief that enjoins Defendants from violating the antitrust laws and requires them to take affirmative steps to dissipate the effects of the violations;
- C. That acts alleged herein be adjudged and decreed to be unlawful restraints of trade in violation of the Sherman Act, 15 U.S.C. § 1;
- D. A judgment against Defendants, jointly and severally, for the damages sustained by Plaintiff and the Class defined herein, and for any additional damages, penalties, and other monetary relief provided by applicable law, including treble damages;
- E. By awarding Plaintiff and Class Members pre-judgment and post-judgment interest as provided by law, and that such interest be awarded at the highest legal rate from and after the date of service of the complaint in this action;
- F. The costs of this suit, including reasonable attorney fees; and
- G. Such other and further relief as the Court deems just and proper.

DEMAND FOR JURY TRIAL

Plaintiff, on behalf of itself and others similarly situated, hereby requests a jury trial, pursuant to Federal Rule of Civil Procedure 38, on any and all claims so triable.

DATED: June 6, 2017

**IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF PENNSYLVANIA**

CASE MANAGEMENT TRACK DESIGNATION FORM

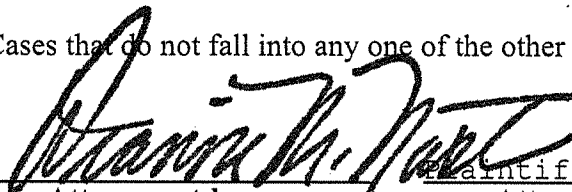

KPH Healthcare Services, Inc.	:	CIVIL ACTION
d/b/a Kinney Drugs, Inc.	:	
	:	
Actavis Holdco U.S., Inc.,	:	NO.
et al.	:	

In accordance with the Civil Justice Expense and Delay Reduction Plan of this court, counsel for plaintiff shall complete a Case Management Track Designation Form in all civil cases at the time of filing the complaint and serve a copy on all defendants. (See § 1:03 of the plan set forth on the reverse side of this form.) In the event that a defendant does not agree with the plaintiff regarding said designation, that defendant shall, with its first appearance, submit to the clerk of court and serve on the plaintiff and all other parties, a Case Management Track Designation Form specifying the track to which that defendant believes the case should be assigned.

SELECT ONE OF THE FOLLOWING CASE MANAGEMENT TRACKS:

- (a) Habeas Corpus – Cases brought under 28 U.S.C. § 2241 through § 2255. ()
- (b) Social Security – Cases requesting review of a decision of the Secretary of Health and Human Services denying plaintiff Social Security Benefits. ()
- (c) Arbitration – Cases required to be designated for arbitration under Local Civil Rule 53.2. ()
- (d) Asbestos – Cases involving claims for personal injury or property damage from exposure to asbestos. ()
- (e) Special Management – Cases that do not fall into tracks (a) through (d) that are commonly referred to as complex and that need special or intense management by the court. (See reverse side of this form for a detailed explanation of special management cases.) (x)
- (f) Standard Management – Cases that do not fall into any one of the other tracks. ()
