

**UNITED STATES DISTRICT COURT  
DISTRICT OF MAINE**

Laura Russell, *individually and on behalf of  
all others similarly situated,*

Plaintiff,

v.

Berry, Dunn, McNeil & Parker, LLC,

Defendant.

Case No.

**CLASS ACTION COMPLAINT**

DEMAND FOR JURY TRIAL

Plaintiff Laura Russell (“Plaintiff”), individually and on behalf of all others similarly situated (the “Class”), brings this Class Action Complaint against Defendant Berry, Dunn, McNeil & Parker, LLC (“Defendant”). The allegations in this Complaint are based on the personal knowledge of the Plaintiff and upon information and belief and further investigation of counsel.

**NATURE OF THE ACTION**

1. This is a data breach class action against Defendant for its failure to adequately secure and safeguard personally identifiable information (“PII”).
2. On or about September 14, 2023, one of Defendant’s vendors notified Defendant that it “discovered suspicious network activity” that impacted Defendant’s systems.
3. Upon learning of the vulnerability, Defendant “immediately implemented” engaged cybersecurity experts to assist with determining what occurred and whether data was compromised.
4. Defendant’s review and investigation was completed on or about April 2, 2024.
5. Defendant concluded that an “unauthorized actor” gained access to the Defendant’s files and took some of the Defendant’s files (“Data Breach”).

6. Defendant has concluded that the impacted information may include “a combination of the following: your name, address, Social Security number, date of birth, and individual health insurance policy number” (Referred collectively throughout this Complaint as “Personally Identifiable Information”)

7. On or about April 29, 2024 Defendant notified affected individuals of the Data Breach.

8. Upon information and belief, the Data Breach affected approximately 1.1 million individuals.

9. Defendant had numerous statutory, regulatory, contractual, and common law duties and obligations, including those based on its affirmative representations to Plaintiff and Class, to keep their PII confidential, safe, secure, and protected from unauthorized disclosure or access.

10. Plaintiff and Class have taken reasonable steps to maintain the confidentiality and security of their PII.

11. Plaintiff and Class reasonably expected and expected Defendant to keep their PII confidential and securely maintained, to use this information for business purposes only, and to make only authorized disclosures of this information.

12. Defendant, however, breached its numerous duties and obligations by failing to implement and maintain reasonable safeguards; failing to comply with industry-standard data security practices and federal and state laws and regulations governing data security; failing to properly train its employees on data security measures and protocols; failing to timely recognize and detect unauthorized third parties accessing its system and that substantial amounts of data had been compromised; and failing to timely notify the impacted Class.

13. In this day and age of regular and consistent data security attacks and data breaches, in particular in the financial industries, and given the sensitivity of the data entrusted to Defendant, this Data Breach is particularly egregious and foreseeable.

14. By implementing and maintaining reasonable safeguards and complying with standard data security practices, Defendant could have prevented this Data Breach.

15. Plaintiff and Class are now faced with a present and imminent lifetime risk of identity theft. These risks are made all the more substantial, and significant because of the inclusion of Social Security numbers and other static PII.

16. PII has great value to cyber criminals, especially Social Security numbers. As a direct cause of Defendant's Data Breach, Plaintiff's and Class's PII is in the hands of cyber-criminals and may be available for sale on the dark web for criminals to access and abuse at Plaintiff's expense. Plaintiff and Class face a current and lifetime risk of imminent identity theft directly related to the Data Breach.

17. Defendant acknowledges the imminent threat the Data Breach has caused to Plaintiff and Class and has assured Plaintiff and Class that it is in the process of taking steps to secure the PII.

18. The modern cyber-criminal can use the information stolen in cyber-attacks to assume a victim's identity when carrying out criminal acts such as:

- a. Using their credit history;
- b. Making financial transactions on their behalf, including opening credit accounts in their name;
- c. Impersonating them via mail and/or email;
- d. Stealing benefits that belong to them;

e. Committing illegal acts which, in turn, incriminate them.

19. Plaintiff's and Class's PII was compromised due to Defendant's negligent and/or careless acts and omissions and the failure to protect Plaintiff's and Class's PII. Defendant not only failed to prevent the Data Breach, but after discovering the Data Breach in September 2023, Defendant waited until April 2024 to notify affected individuals such as Plaintiff and members of the Class.

20. As a result of Defendant's delayed response, Plaintiff and Class had no idea their PII had been compromised, and that they were, and continue to be, at significant and imminent risk of identity theft and various other forms of personal, social and financial harm. The risk will remain for their respective lifetimes because of Defendant's negligence.

21. Plaintiff brings this action on behalf of all persons whose PII was compromised because Defendant failed to:

- (i) adequately protect consumers' PII entrusted to it,
- (ii) warn its current and former customers, potential customers, and current and former employees of their inadequate information security practices, and
- (iii) effectively monitor their websites and platforms for security vulnerabilities and incidents.

Defendant's conduct amounts to negligence and violates federal and state statutes and guidelines.

22. As a result of the Data Breach, Plaintiff and Class suffered ascertainable losses, including but not limited to, a loss of privacy. These injuries include: (i) invasion of privacy; (ii) theft of their PII; (iii) lost or diminished value of PII; (iv) lost time and opportunity costs associated with attempting to mitigate the actual consequences of the Data Breach; (v) loss of benefit of the bargain; (vi) lost opportunity costs associated with attempting to mitigate the actual consequences of the Data Breach; (vii) statutory damages; (viii) nominal damages; and (ix) the continued and

certainly increased risk to their PII, which: (a) remains unencrypted and available for unauthorized third parties to access and abuse; and (b) remains backed up in Defendant's possession and is subject to further unauthorized disclosures so long as Defendant fails to undertake appropriate and adequate measures to protect the PII.

23. Plaintiff seeks to remedy these harms, and prevent any future data compromise on behalf of herself and all similarly situated persons whose personal data was compromised and stolen as a result of the Data Breach and remains at risk due to inadequate data security.

24. Accordingly, Plaintiff, on behalf of herself and the Class, asserts claims for negligence, negligence per se, and unjust enrichment. Plaintiff seeks injunctive relief, declaratory relief, monetary damages, and all other relief as authorized in equity or by law.

### **PARTIES**

#### **Plaintiff Laura Russell**

25. Plaintiff Laura Russell was and currently is a citizen of Forest City, Pennsylvania at all relevant times. Ms. Russell received Defendant's Notice of Data Breach letter from Defendant nearly seven months after the Data Breach was detected, in April 2024.

26. The Notice advised that the PII that could have been accessed included Ms. Russell's name, address, Social Security number, date of birth, and individual health insurance policy number.

27. Prior to this Data Breach, Plaintiff Russell had taken steps to protect against keeping her PII safe and monitored her PII closely. She has not knowingly transmitted her PII over unsecured or unencrypted internet connections.

28. Plaintiff has suffered actual damages and is at imminent, impending, and substantial risk for identity theft and future economic harm due to the highly sensitive nature of the

information that was targeted and stolen in the Data Breach. Since learning about the breach, in an effort to mitigate the risk, Plaintiff has spent time and effort reviewing financial statements and identity theft protection reports to detect and prevent identity theft. Plaintiff has suffered and continues to suffer emotional anguish and distress, including but not limited to fear and anxiety related to the theft and compromise of her PII. Plaintiff will continue to spend additional time and incur future economic costs associated with the detection and prevention of identity theft.

**Defendant Berry, Dunn, McNeil & Parker, LLC**

29. Defendant is a corporation with its headquarters located at 2211 Congress Street, Portland, Maine 04102.

30. Defendant’s website claims that it “is a leading national professional services firm providing assurance, tax, and consulting services to businesses, nonprofits, and government agencies throughout the US and its territories.”<sup>1</sup>

31. Defendant collects and requires its customers to provide PII, in the course of providing its financial services.

32. By obtaining, collecting, using, and deriving benefit from Plaintiff’s and Class’s PII, Defendant assumed legal and equitable duties to those persons, and knew or should have known that it was responsible for protecting Plaintiff’s and Class’s PII from unauthorized disclosure and/or criminal hacking activity.

**JURISDICTION AND VENUE**

33. This Court has subject matter jurisdiction over this action under the Class Action Fairness Act, 28 U.S.C. § 1332(d), *et seq.* The amount in controversy exceeds \$5 million, exclusive of interest and costs. There are more than 100 members in the proposed class, and at least one

---

<sup>1</sup> <https://www.berrydunn.com/about>

member of the class is a citizen of a state different from Defendant, including Plaintiff. Thus, minimal diversity exists under 28 U.S.C. § 1332(d)(2)(A).

34. This Court has personal jurisdiction over Defendant because Defendant's principal places of business is located within this District and the Defendant conducts substantial business in this district.

35. Venue is proper in this Court under 28 U.S.C. § 1391, because a substantial part of the events or omissions giving rise to these claims occurred in, were directed to, and/or emanated from this District, and Defendant resides within this judicial district.

## **FACTUAL ALLEGATIONS**

### **Background**

36. In the ordinary course of its business practices, Defendant stores, maintains, and uses Plaintiff's and Class Members' PII including but not limited to: full names, Social Security numbers, and addresses.

37. Defendant understands the importance of securely maintaining PII.<sup>2</sup>

### **The Data Breach**

38. Defendant learned that its systems were compromised in September 2023.

39. Although Defendant learned of the Data Breach in September 2023, Defendant waited until the end of April 2024 to notify affected individuals.

40. Defendant waited approximately seven months after learning of the Data Breach before notifying affected individuals.

---

<sup>2</sup><https://www.berrydunn.com/privacypolicy.aspx#:~:text=By%20providing%20this%20personal%20information,to%20an%20unrelated%20third%20party.>

41. Additionally, though Plaintiff and Class have an interest in ensuring that their information remains protected, the details of the root cause of the Data Breach, the vulnerabilities exploited, and the remedial measures taken to ensure a breach does not occur again have not been shared with regulators or the Class.

#### **Defendant Was Aware of the Data Breach Risks**

42. Defendant had obligations created by contract, industry standards, common law, and representations made to Plaintiff and Class, to keep their PII confidential and to protect it from unauthorized access and disclosure.

43. Plaintiff and Class provided their PII to Defendant with the reasonable expectation and mutual understanding that Defendant would comply with their obligations to employ reasonable care to keep such information confidential and secure from unauthorized access.

44. Defendant's data security obligations were particularly important given the substantial increase in cyber-attacks and/or data breaches in the banking/credit/financial services industry preceding the date of the breach.

45. Indeed, data breaches, such as the one experienced by Defendant, have become so notorious that the Federal Bureau of Investigation ("FBI") and U.S. Secret Service have issued a warning to potential targets so they are aware of, and prepared for, a potential attack. Therefore, the increase in such attacks, and attendant risk of future attacks, was widely known and completely foreseeable to the public and to anyone in Defendant's industry, including Defendant.

46. According to the Federal Trade Commission ("FTC"), identity theft wreaks havoc on consumers' finances, credit history, and reputation and can take time, money, and patience to

resolve.<sup>3</sup> Identity thieves use the stolen personal information for a variety of crimes, including credit card fraud, phone or utilities fraud, and bank and finance fraud.<sup>4</sup>

47. The PII of Plaintiff and Class were taken by cyber criminals for the very purpose of engaging in identity theft, or to sell it to other criminals who will purchase the PII for that purpose. The fraudulent activity resulting from the Data Breach may not come to light for years.

48. Defendant knew, or reasonably should have known, of the importance of safeguarding the PII of Plaintiff and Class, including Social Security numbers, driver's license numbers and/or state identification numbers, and of the foreseeable consequences that would occur if Defendant's data security systems were breached, including, specifically, the significant costs that would be imposed on Plaintiff and Class as a result of a breach.

49. Plaintiff and Class now face years of constant surveillance of their financial and personal records, monitoring, and loss of rights. The Class is incurring and will continue to incur such damages in addition to any fraudulent use of their PII.

50. The injuries to Plaintiff and Class were directly and proximately caused by Defendant's own failure to implement or maintain adequate data security measures for the PII of Plaintiff and the Class.

### **Defendant Failed to Comply with FTC Guidelines**

---

<sup>3</sup> See *Taking Charge, What to Do If Your Identity is Stolen*, FTC, 3 (Apr. 2013), <https://www.myoccu.org/sites/default/files/pdf/taking-charge-1.pdf> (last visited Nov. 24, 2021).

<sup>4</sup> *Id.* The FTC defines identity theft as “a fraud committed or attempted using the identifying information of another person without authority.” 16 CFR § 603.2. The FTC describes “identifying information” as “any name or number that may be used, alone or in conjunction with any other information, to identify a specific person,” including, among other things, “[n]ame, social security number, date of birth, official State or government issued driver's license or identification number, alien registration number, government passport number, employer or taxpayer identification number.” *Id.*

51. The FTC has promulgated numerous guides for businesses which highlight the importance of implementing reasonable data security practices. According to the FTC, the need for data security should be factored into all business decision-making.

52. In 2016, the FTC updated its publication, *Protecting Personal Information: A Guide for Business*, which established cyber-security guidelines for businesses. The guidelines note that businesses should protect the personal customer information that they keep; properly dispose of personal information that is no longer needed; encrypt information stored on computer networks; understand their networks' vulnerabilities; and implement policies to correct any security problems. The guidelines also recommend that businesses use an intrusion detection system to expose a breach as soon as it occurs; monitor all incoming traffic for activity indicating someone is attempting to hack the system; watch for large amounts of data being transmitted from the system; and have a response plan ready in the event of a breach.

53. The FTC further recommends that companies not maintain PII longer than is needed for authorization of a transaction; limit access to sensitive data; require complex passwords to be used on networks; use industry-tested methods for security; monitor for suspicious activity on the network; and verify that third-party service providers have implemented reasonable security measures.

54. The FTC has brought enforcement actions against businesses for failing to protect consumer data adequately and reasonably, treating the failure to employ reasonable and appropriate measures to protect against unauthorized access to confidential consumer data as an unfair act or practice prohibited by Section 5 of the Federal Trade Commission Act ("FTCA"), 15 U.S.C. § 45. Orders resulting from these actions further clarify the measures businesses must take to meet their data security obligations.

55. Defendant failed to properly implement basic data security practices, and its failure to employ reasonable and appropriate measures to protect against unauthorized access to consumer PII constitutes an unfair act or practice prohibited by Section 5 of the FTCA, 15 U.S.C. § 45.

56. To prevent and detect cyber attacks, including the attack that resulted in the Data Breach, Defendant could and should have implemented, as recommended by the United States Government, the following measures:

- a. Implement an awareness and training program. Because end users are targets, employees and individuals should be aware of the threat of malware and how it is delivered;
- b. Enable strong spam filters to prevent phishing emails from reaching the end users and authenticate inbound email using technologies like Sender Policy Framework (SPF), Domain Message Authentication Reporting and Conformance (DMARC), and DomainKeys Identified Mail (DKIM) to prevent email spoofing;
- c. Scan all incoming and outgoing emails to detect threats and filter executable files from reaching end users;
- d. Configure firewalls to block access to known malicious IP addresses;
- e. Patch operating systems, software, and firmware on devices. Consider using a centralized patch management system;
- f. Set anti-virus and anti-malware programs to conduct regular scans automatically;
- g. Manage the use of privileged accounts based on the principle of least privilege: no users should be assigned administrative access unless absolutely needed; and those with a need for administrator accounts should only use them when necessary;
- h. Configure access controls—including file, directory, and network share permissions— with least privilege in mind. If a user only needs to read specific files, the user should not have write access to those files, directories, or shares;
- i. Disable macro scripts from office files transmitted via email. Consider using Office Viewer software to open Microsoft Office files transmitted via email instead of full office suite applications;

- j. Implement Software Restriction Policies (SRP) or other controls to prevent programs from executing from common malware locations, such as temporary folders supporting popular Internet browsers or compression/decompression programs, including the AppData/LocalAppData folder;
- k. Consider disabling Remote Desktop protocol (RDP) if it is not being used;
- l. Use application whitelisting, which only allows systems to execute programs known and permitted by security policy;
- m. Execute operating system environments or specific programs in a virtualized environment; and
- n. Categorize data based on organizational value and implement physical and logical separation of networks and data for different organizational units.

57. Defendant was at all times fully aware of its obligation to protect the PII of customers, prospective customers and employees. Defendant was also aware of the significant repercussions that would result from its failure to do so.

#### **Defendant Failed to Comply with Industry Standards**

58. A number of industry and national best practices have been published and should have been used as a go-to resource and authoritative guide when developing Defendant's cybersecurity practices. Best cybersecurity practices that are standard in the financial services industry include installing appropriate malware detection software; monitoring and limiting the network ports; protecting web browsers and email management systems; setting up network systems such as firewalls, switches and routers; monitoring and protection of physical security systems; protection against any possible communication system; and training staff regarding critical points.

59. Upon information and belief, Defendant failed to meet the minimum standards of the following cybersecurity frameworks: the NIST Cybersecurity Framework Version 1.1

(including without limitation PR.AC-1, PR.AC-3, PR.AC-4, PR.AC-5, PR.AC-6, PR.AC-7, PR.AT-1, PR.DS-1, PR.DS-5, PR.PT-1, PR.PT-3, DE.CM-1, DE.CM-4, DE.CM-7, DE.CM-8, and RS.CO-2), and the Center for Internet Security's Critical Security Controls (CIS CSC), which are established standards in reasonable cybersecurity readiness. These frameworks are existing and applicable industry standards in Defendant's industry, and Defendant failed to comply with these accepted standards, thereby opening the door to the cyber-attack and causing the Data Breach.

60. The occurrence of the Data Breach indicates that Defendant failed to adequately implement one or more of the above measures to prevent ransomware attacks, resulting in the Data Breach.

### **PII Holds Value to Cyber Criminals**

61. Businesses, such as Defendant, that store PII are likely to be targeted by cyber criminals. Credit card and bank account numbers may be tempting targets for hackers, but information such as dates of birth, driver's license and Social Security numbers are even more attractive to cyber criminals; they are not easily destroyed and can be easily used to perpetrate identity theft and other types of fraud.

62. The PII of individuals remains of high value to criminals, as evidenced by the prices they will pay through the dark web. Numerous sources cite dark web pricing for stolen identity credentials. For example, personal information can be sold at a price ranging from \$40 to \$200, and bank details have a price range of \$50 to \$200.<sup>5</sup>

---

<sup>5</sup> *Your personal data is for sale on the dark web. Here's how much it costs*, Digital Trends, (Oct. 16, 2019), <https://www.digitaltrends.com/computing/personal-data-sold-on-the-dark-web-how-much-it-costs> (last visited Apr. 7, 2021).

63. Social Security numbers, for example, are among the worst kind of personal information to have stolen because they may be put to a variety of fraudulent uses and are difficult for an individual to change. The Social Security Administration (“SSA”) stresses that the loss of an individual’s Social Security number, as is the case here, can lead to identity theft and extensive financial fraud:

A dishonest person who has your Social Security number can use it to get other personal information about you. Identity thieves can use your number and your good credit to apply for more credit in your name. Then, they use the credit cards and don’t pay the bills, it damages your credit. You may not find out that someone is using your number until you’re turned down for credit, or you begin to get calls from unknown creditors demanding payment for items you never bought. Someone illegally using your Social Security number and assuming your identity can cause a lot of problems.<sup>6</sup>

64. What is more, it is no easy task to change or cancel a stolen Social Security number. An individual cannot obtain a new Social Security number without significant paperwork and evidence of actual misuse. In other words, preventive action to defend against the possibility of misuse of a Social Security number is not permitted; an individual must show evidence of actual, ongoing fraud activity to obtain a new number.

65. Furthermore, as the SSA warns:

Keep in mind that a new number probably will not solve all your problems. This is because other governmental agencies (such as the IRS and state motor vehicle agencies) and private businesses (such as banks and credit reporting companies) likely will have records under your old number. Along with other personal information, credit reporting companies use the number to identify your credit record. So using a new number will not guarantee you a fresh start. This is especially true if your other personal information, such as your name and address, remains the same.

If you receive a new Social Security Number, you should not be able to use the old number anymore.

---

<sup>6</sup> *Identity Theft and Your Social Security Number*, <https://www.ssa.gov/pubs/EN-05-10064.pdf> (last accessed Nov. 24, 2021).

For some victims of identity theft, a new number actually creates new problems. If the old credit information is not associated with your new number, the absence of any credit history under the new number may make more difficult for you to get credit.<sup>7</sup>

66. Here, the unauthorized access left the cyber criminals with the tools to perform the most thorough identity theft—they have obtained all the essential PII to mimic the identity of the user. The personal data of Plaintiff and Class stolen in the Data Breach constitutes a dream for hackers and a nightmare for Plaintiff and Class. Stolen personal data of Plaintiff and Class represents essentially one-stop shopping for identity thieves.

67. The FTC has released its updated publication on protecting PII for businesses, which includes instructions on protecting PII, properly disposing of PII, understanding network vulnerabilities, implementing policies to correct security problems, using intrusion detection programs, monitoring data traffic, and having in place a response plan.

68. General policy reasons support such an approach. A person whose personal information has been compromised may not see any signs of identity theft for years. According to the United States Government Accountability Office (“GAO”) Report to Congressional Requesters:

[L]aw enforcement officials told us that in some cases, stolen data may be held for up to a year or more before being used to commit identity theft. Further, once stolen data have been sold or posted on the Web, fraudulent use of that information may continue for years. As a result, studies that attempt to measure the harm resulting from data breaches cannot necessarily rule out all future harm.<sup>8</sup>

69. Companies recognize that PII is a valuable asset and a valuable commodity. A “cyber black-market” exists in which criminals openly post stolen Social Security numbers and

---

<sup>7</sup> *Id.*

<sup>8</sup> *See* <https://www.gao.gov/assets/gao-07-737.pdf> (June 2007) at 29.

other PII on a number of Internet websites. The stolen personal data of Plaintiff and Class has a high value on both legitimate and black markets.

70. Identity thieves may commit various types of crimes such as immigration fraud, obtaining a driver's license or identification card in the victim's name but with another's picture, and/or using the victim's information to obtain a fraudulent tax refund or fraudulent unemployment benefits. The United States government and privacy experts acknowledge that it may take years for identity theft to come to light and be detected.

71. As noted above, the disclosure of Social Security numbers in particular poses a significant risk. Criminals can, for example, use Social Security numbers to create false bank accounts or file fraudulent tax returns. Class members whose Social Security numbers have been compromised now face a real, present, imminent and substantial risk of identity theft and other problems associated with the disclosure of their Social Security number and will need to monitor their credit and tax filings for an indefinite duration.

72. Based on the foregoing, the information compromised in the Data Breach is significantly more valuable than the loss of, for example, credit card information in a retailer data breach, because those victims can cancel or close credit and debit card accounts. The information compromised in this Data Breach is impossible to "close" and difficult, if not impossible, to change — Social Security number, name, and date of birth.

73. This data demands a much higher price on the black market. Martin Walter, senior director at cybersecurity firm RedSeal, explained, "Compared to credit card information,

personally identifiable information and Social Security numbers are worth more than 10x on the black market.”<sup>9</sup>

74. Among other forms of fraud, identity thieves may obtain driver’s licenses, government benefits, medical services, and housing or even give false information to police. An individual may not know that her or her driver’s license was used to file for unemployment benefits until law enforcement notifies the individual’s employer of the suspected fraud, or until the individual attempts to lawfully apply for unemployment and is denied benefits (due to the prior, fraudulent application and award of benefits).

### **Plaintiff’s and Class Members’ Damages**

75. Defendant has failed to provide adequate compensation for the unauthorized release and disclosure of Plaintiff’s and Class’s PII to individuals involved in the Data Breach.

76. Plaintiff and Class have been damaged by the compromise of their PII in the Data Breach.

77. Plaintiff and Class presently face substantial risk of out-of-pocket fraud losses such as loans opened in their names, tax return fraud, utility bills opened in their names, credit card fraud, and similar identity theft.

78. Plaintiff and Class have been, and currently face substantial risk of being targeted now and in the future, subjected to phishing, data intrusion, and other illegality based on their PII as potential fraudsters could use that information to target such schemes more effectively to Plaintiff and Class.

---

<sup>9</sup> Tim Greene, *Anthem Hack: Personal Data Stolen Sells for 10x Price of Stolen Credit Card Numbers*, IT World, (Feb. 6, 2015), <https://www.networkworld.com/article/2880366/anthem-hack-personal-data-stolen-sells-for-10x-price-of-stolen-credit-card-numbers.html> (last visited Apr. 7, 2021).

79. Plaintiff and Class may also incur out-of-pocket costs for protective measures such as credit monitoring fees, credit report fees, credit freeze fees, and similar costs directly or indirectly related to the Data Breach.

80. Plaintiff and Class also suffered a loss of value of their PII when it was acquired by cyber thieves in the Data Breach. Numerous courts have recognized the propriety of loss of value damages in data breach cases.

81. Plaintiff and Class have spent and will continue to spend significant amounts of time to monitor their financial accounts and records for misuse.

82. Plaintiff and Class have suffered or will suffer actual injury as a direct result of the Data Breach. Many victims suffered ascertainable losses in the form of out-of-pocket expenses and the value of their time reasonably incurred to remedy or mitigate the effects of the Data Breach

83. Moreover, Plaintiff and Class have an interest in ensuring that their PII, which is believed to remain in the possession of Defendant, is protected from further breaches by the implementation of security measures and safeguards, including but not limited to, making sure that the storage of data or documents containing personal and financial information is not accessible online and that access to such data is password protected.

84. Further, as a result of Defendant's conduct, Plaintiff and Class are forced to live with the anxiety that their PII—which contains the most intimate details about a person's life—may be disclosed to the entire world, thereby subjecting them to embarrassment and depriving them of any right to privacy whatsoever.

85. As a direct and proximate result of Defendant's actions and inactions, Plaintiff and Class have suffered anxiety, emotional distress, and loss of privacy, and are at an increased risk of future harm.

### **Plaintiff Russell's Experience**

86. Plaintiff Russell entrusted her PII and other confidential information to Defendant with the reasonable expectation and understanding that Defendant or its agents, would take industry-standard precautions to protect, maintain, and safeguard that information from unauthorized users or disclosure, and would timely notify her of any data security incidents related to her PII. Plaintiff Russell would not have allowed Defendant's financial services to collect and maintain her PII had she known that Defendant would not take reasonable steps to safeguard her PII.

87. Plaintiff Russell has been forced to spend time dealing with and responding to the direct consequences of the Data Breach, which include spending time on the telephone calls, researching the Data Breach, exploring credit monitoring and identity theft insurance options, and self-monitoring her accounts. This is time that has been lost forever and cannot be recaptured.

88. Plaintiff Russell stores all documents containing her PII in a safe and secure location. Moreover, she diligently chooses unique usernames and passwords for the online accounts that she has.

89. Plaintiff Russell has suffered actual injury in the form of damages to, and diminution in, the value of her PII – a form of intangible property that Plaintiff Russell entrusted to Defendant. This PII was compromised in, and has been diminished as a result of, the Data Breach.

90. Plaintiff Russell has also suffered actual injury in the forms of lost time and opportunity costs, annoyance, interference, and inconvenience as a result of the Data Breach, and has anxiety and increased concerns due to the loss of her privacy and the substantial risk of fraud and identity theft which she now faces.

91. Plaintiff Russell has suffered imminent and impending injury arising from the substantially increased risk of fraud, identity theft, and misuse of her PII resulting from the compromise of her PII, especially her Social Security number, in combination with her name, address, phone number, and email address, which PII is now in the hands of cyber criminals and other unauthorized third parties.

92. Knowing that thieves stole her PII, including her Social Security number and/or driver's license number and other PII that she was required to provide to Defendant through her employer, and knowing that her PII will likely be sold on the dark web, has caused Plaintiff Russell great anxiety.

93. Additionally, Plaintiff Russell does not recall having been involved in any other data breaches in which her highly confidential PII, such as Social Security Number was compromised.

94. Plaintiff Russell has a continuing interest in ensuring that her PII which, upon information and belief, remains in the possession of Defendant, is protected and safeguarded from future data breaches.

95. As a result of the Data Breach, Plaintiff Russell is presently and will continue to be at a present and heightened risk for financial fraud, identity theft, other forms of fraud, and the attendant damages, for years to come.

### **CLASS ALLEGATIONS**

96. Plaintiff brings this nationwide class action according to Federal Rules of Civil Procedure, Rules 23(b)(2), 23(b)(3), and 23(c)(4).

97. The Nationwide Class that Plaintiff seeks to represent is defined as follows:

All persons residing in the United States whose PII was compromised during the Data Breach that is the subject of the Notice of Data Breach published by Defendant on or about April 29, 2024 (the “Class”)

98. Excluded from the Class are all individuals who make a timely election to be excluded from this proceeding using the correct protocol for opting out, and all judges assigned to hear any aspect of this litigation and their immediate family members.

99. Plaintiff reserves the right to modify or amend the definitions of the proposed Class before the Court determines whether certification is appropriate.

100. **Numerosity.** The Class is so numerous that joinder of all members is impracticable. The Class includes thousands of individuals whose personal data was compromised by the Data Breach. The exact number of Class members is in the possession and control of Defendant and will be ascertainable through discovery, but Defendant has disclosed that approximately 1.1 million individuals PII was involved in the Data Breach.

101. **Commonality.** There are numerous questions of law and fact common to Plaintiff and the Class that predominate over any questions that may affect only individual Class members, including, without limitation:

- a. Whether Defendant unlawfully maintained, lost or disclosed Plaintiff’s and Class’s Private Information;
- b. Whether Defendant failed to implement and maintain reasonable security procedures and practices appropriate to the nature and scope of the information compromised in the Data Breach;
- c. Whether Defendant’s data security systems prior to and during the Data Breach complied with applicable data security laws and regulations;
- d. Whether Defendant’s data security systems prior to and during the Data Breach were consistent with industry standards;
- e. Whether Defendant owed a duty to Class to safeguard their Private Information;
- f. Whether Defendant breached duties to Class to safeguard their Private Information;

- g. Whether cyber criminals obtained Class's Private Information in the Data Breach;
- h. Whether Defendant knew or should have known that its data security systems and monitoring processes were deficient;
- i. Whether Defendant owed a duty to provide Plaintiff and Class timely notice of this Data Breach, and whether Defendant breached that duty;
- j. Whether Plaintiff and Class suffered legally cognizable damages as a result of Defendant's misconduct;
- k. Whether Defendant's conduct was negligent;
- l. Whether Defendant's conduct violated federal law;
- m. Whether Defendant's conduct violated state law; and
- n. Whether Plaintiff and Class are entitled to damages, civil penalties, punitive damages, and/or injunctive relief.

102. **Typicality.** Plaintiff's claims are typical of the claims of the Class in that Plaintiff, like all Class members, had her PII compromised, breached, and stolen in the Data Breach. Plaintiff and all Class were injured through the uniform misconduct of Defendant, described throughout this Complaint, and assert the same claims for relief.

103. **Adequacy.** Plaintiff and counsel will fairly and adequately protect the interests of the Class. Plaintiff retained counsel who are experienced in Class action and complex litigation. Plaintiff has no interests that are antagonistic to, or in conflict with, the interests of other Class members.

104. **Superiority.** A class action is superior to other available methods for the fair and efficient adjudication of this controversy. Class treatment of common questions of law and fact is superior to multiple individual actions or piecemeal litigation. Moreover, absent a class action, most Class members would find the cost of litigating their claims prohibitively high and would therefore have no effective remedy, so that in the absence of class treatment, Defendant's violations of law inflicting substantial damages in the aggregate would go unremedied without

certification of the Class. Plaintiff and Class have been harmed by Defendant's wrongful conduct and/or action. Litigating this action as a class action will reduce the possibility of repetitious litigation relating to Defendant's conduct and/or inaction. Plaintiff knows of no difficulties that would be encountered in this litigation that would preclude its maintenance as a class action.

105. Class certification is appropriate under Fed. R. Civ. P. 23(b)(1)(A), in that the prosecution of separate actions by the individual Class members would create a risk of inconsistent or varying adjudications with respect to individual members of the Class, which would establish incompatible standards of conduct for Defendant. In contrast, the conduct of this action as a class action conserves judicial resources and the parties' resources and protects the rights of each member of the Class. Specifically, injunctive relief could be entered in multiple cases, but the ordered relief may vary, causing Defendant to have to choose between differing means of upgrading its data security infrastructure and choosing the court order with which to comply. Class action status is also warranted because prosecution of separate actions by Class members would create the risk of adjudications with respect to individual Class members that, as a practical matter, would be dispositive of the interests of other members not parties to this action, or that would substantially impair or impede their ability to protect their interests.

106. Class certification, therefore, is appropriate under Rule 23(a) and (b)(2) because Defendant has acted or refused to act on grounds generally applicable to the Class, so that final injunctive relief or corresponding declaratory relief is appropriate as to the Class as a whole.

107. Likewise, particular issues under Rule 23(c)(4) are appropriate for certification because such claims present only particular, common issues, the resolution of which would advance the disposition of this matter and the parties' interests therein. Such particular issues include, but are not limited to:

- a. Whether Defendant owed a legal duty to Plaintiff and Class to exercise due care in collecting, storing, using, and safeguarding their PII;
- b. Whether Defendant breached a legal duty to Plaintiff and the Class to exercise due care in collecting, storing, using, and safeguarding their PII;
- c. Whether Defendant failed to comply with its own policies and applicable laws, regulations, and industry standards relating to data security;
- d. Whether Defendant failed to implement and maintain reasonable security procedures and practices appropriate to the nature and scope of the information compromised in the Data Breach; and
- e. Whether Plaintiff and Class are entitled to actual damages, credit monitoring or other injunctive relief, and/or punitive damages as a result of Defendant's wrongful conduct.

**COUNT I**  
**Negligence**

**(On behalf of Plaintiff and the Class)**

108. Plaintiff and Class re-allege and incorporate all foregoing paragraphs of this Complaint.

109. Plaintiff and Class entrusted Defendant with their PII.

110. Plaintiff and Class entrusted their PII to Defendant on the premise and with the understanding that Defendant would safeguard their information, use their PII for business purposes only, and not disclose their PII to unauthorized third parties.

111. Defendant owed a duty to Plaintiff and Class to exercise reasonable care in obtaining, using, and protecting their PII from unauthorized third parties.

112. The legal duties owed by Defendant to Plaintiff and the Class include, but are not limited to the following:

- a. To exercise reasonable care in obtaining, retaining, securing, safeguarding, deleting, and protecting the PII of Plaintiff and Class in their possession;

- b. To protect PII of Plaintiff and Class in their possession using reasonable and adequate security procedures that are compliant with industry-standard practices; and
- c. To implement processes to quickly detect a data breach and to timely act on warnings about data breaches, including promptly notifying Plaintiff and Class of the Data Breach.

113. Defendant's duty to use reasonable data security measures also arose under Section 5 of the Federal Trade Commission Act, 15 U.S.C. § 45(a) (the "FTC Act"), which prohibits "unfair . . . practices in or affecting commerce," including, as interested and enforced by the Federal Trade Commission, the unfair practices by companies such as Defendant of failing to use reasonable measures to protect PII.

114. Various FTC publications and data security breach orders further form the basis of Defendant's duty. Plaintiff and Class are consumers under the FTC Act. Defendant violated Section 5 of the FTC Act by failing to use reasonable measures to protect PII and by not complying with industry standards.

115. Defendant breached its duties to Plaintiff and Class. Defendant knew or should have known the risks of collecting and storing PII and the importance of maintaining secure systems, especially in light of the fact that data breaches have recently been prevalent.

116. Defendant knew or should have known that its security practices did not adequately safeguard the PII of Plaintiff and Class.

117. Through Defendant's acts and omissions described in this Complaint, including Defendant's failure to provide adequate security and its failure to protect the PII of Plaintiff and Class from being foreseeably captured, accessed, exfiltrated, stolen, disclosed, and misused, Defendant unlawfully breached its duty to use reasonable care to adequately protect and secure the PII of Plaintiff and Class during the period it was within Defendant's possession and control.

118. Defendant's duty to use reasonable security measures arose as a result of the special relationship that existed between Defendant and Plaintiff and Class. That special relationship arose because Plaintiff and Class entrusted Defendant with their confidential PII, a necessary part of obtaining services from Defendant.

119. Defendant was subject to an "independent duty," untethered to any contract between Defendant and Plaintiff.

120. Defendant's own conduct created a foreseeable risk of harm to a foreseeable individual, including Plaintiff and Class. Defendant's misconduct included, but was not limited to, their failure to take the steps and opportunities to prevent the Data Breach as set forth herein. Defendant's misconduct also included their decisions not to comply with industry standards for safekeeping of the PII of Plaintiff and Class, including basic encryption techniques freely available to Defendant.

121. Defendant was in a position to protect against the harm suffered by Plaintiff and Class as a result of the Data Breach.

122. Defendant had a duty to employ proper procedures to prevent the unauthorized dissemination of the PII of Plaintiff and Class.

123. Defendant breached the duties it owes to Plaintiff and Class in several ways, including:

- a. Failing to implement adequate security systems, protocols, and practices sufficient to protect employees' and customers' PII and thereby creating a foreseeable risk of harm;
- b. Failing to comply with the minimum industry data security standards during the period of the Data Breach;
- c. Failing to act despite knowing or having reason to know that its systems were vulnerable to attack; and

- d. Failing to timely and accurately disclose to customers and employees that their PII had been improperly acquired or accessed and was potentially available for sale to criminals on the dark web.

124. There is a close causal connection between Defendant's failure to implement security measures to protect the PII of Plaintiff and Class and the harm, or risk of imminent harm, suffered by Plaintiff and Class. The PII of Plaintiff and Class was stolen and accessed as the proximate result of Defendant's failure to exercise reasonable care in safeguarding such PII by adopting, implementing, and maintaining appropriate security measures.

125. Due to Defendant's conduct, Plaintiff and Class are entitled to credit monitoring. The PII taken can be used for identity theft and other types of financial fraud against the members of the Class.

126. Some experts recommend that data breach victims obtain credit monitoring services for at least ten years following a data breach. Annual subscriptions for credit monitoring plans range from approximately \$219 to \$358 per year.

127. As a result of Defendant's negligence, Plaintiff and Class suffered injuries that include: (i) invasion of privacy; (ii) theft of their PII; (iii) lost or diminished value of PII; (iv) lost time and opportunity costs associated with attempting to mitigate the actual consequences of the Data Breach; (v) loss of benefit of the bargain; (vi) lost opportunity costs associated with attempting to mitigate the actual consequences of the Data Breach; (vii) statutory damages; (viii) nominal damages; and (ix) the continued and certainly increased risk to their PII, which: (a) remains unencrypted and available for unauthorized third parties to access and abuse; and (b) remains backed up in Defendant's possession and is subject to further unauthorized disclosures so long as Defendant fails to undertake appropriate and adequate measures to protect the PII.

128. These injuries were reasonably foreseeable given the history of security breaches of this nature in the financial sector. The injury and harm that Plaintiff and Class suffered was the direct and proximate result of Defendant's negligent conduct.

**COUNT II**  
**Negligence *Per Se***  
**(On behalf of Plaintiff and the Class)**

129. Plaintiff and Class re-allege and incorporate all foregoing paragraphs of this Complaint.

130. Section 5 of the FTC Act prohibits "unfair . . . practices in or affecting commerce," including, as interpreted and enforced by the FTC, the unfair act or practice by businesses, such as Defendant, of failing to use reasonable measures to protect PII. The FTC publications and orders described above also form part of the basis of Defendant's duty in this regard.

131. Defendant violated Section 5 of the FTC Act by failing to use reasonable measures to protect PII and comply with applicable industry standards. Defendant's conduct was particularly unreasonable given the nature and amount of PII it obtained and stored and the foreseeable harm.

132. Defendant's violations of Section 5 of the FTC Act constitute negligence *per se*.

133. Plaintiff and Class are within the class of persons that the FTC Act was intended to protect.

134. The harm that occurred as a result of the Data Breach is the type of harm the FTC Act was intended to guard against. The FTC has pursued enforcement actions against businesses, which, as a result of its failure to employ reasonable data security measures and avoid unfair and deceptive practices, caused the same harm as that suffered by Plaintiff and Class.

135. As a direct and proximate result of Defendant's negligence *per se*, Plaintiff and Class have suffered and will suffer injury, including but not limited to: (i) invasion of privacy; (ii) theft of their PII; (iii) lost or diminished value of PII; (iv) lost time and opportunity costs associated

with attempting to mitigate the actual consequences of the Data Breach; (v) loss of benefit of the bargain; (vi) lost opportunity costs associated with attempting to mitigate the actual consequences of the Data Breach; (vii) statutory damages; (viii) nominal damages; and (ix) the continued and certainly increased risk to their PII, which: (a) remains unencrypted and available for unauthorized third parties to access and abuse; and (b) remains backed up in Defendant's possession and is subject to further unauthorized disclosures so long as Defendant fails to undertake appropriate and adequate measures to protect the PII.

136. Additionally, as a direct and proximate result of Defendant's negligence *per se*, Plaintiff and Class have suffered and will suffer the continued risks of exposure of their PII, which remains in Defendant's possession and is subject to further unauthorized disclosures so long as Defendant fails to undertake appropriate and adequate measures to protect the PII in its continued possession.

137. As a direct and proximate result of Defendant's negligence *per se*, Plaintiff and the Class are entitled to recover actual, consequential, and nominal damages.

**COUNT III**  
**Unjust Enrichment**  
**(On behalf of Plaintiff and the Class)**

138. Plaintiff and Class re-allege and incorporate all foregoing paragraphs of this Complaint.

139. Plaintiff and Class conferred a monetary benefit to Defendant by providing Defendant with their valuable PII, which Defendant knowingly used or retained in the course of its business.

140. Defendant benefited from receiving Plaintiff's and Class members' PII by its ability to retain and use that information for its own financial business benefit. Defendant understood this benefit and accepted the benefit knowingly.

141. Defendant also understood and appreciated that the PII of Plaintiff and Class was private and confidential to them, and that its value depended upon Defendant maintaining the privacy and confidentiality of that PII.

142. Plaintiff and Class conferred a monetary benefit upon Defendant in the form of monies paid to Defendant for services.

143. The monies paid to Defendant for services involving Plaintiff and Class PII were to be used by Defendant, in part, to pay for the administrative costs of reasonable data privacy and security practices and procedures.

144. Defendant also understood and appreciated that Plaintiff and Class PII was private and confidential, and its value depended upon Defendant maintaining the privacy and confidentiality of that PII.

145. But for Defendant's willingness and commitment to maintain privacy and confidentiality, that PII would not have been transferred to and entrusted with Defendant. Indeed, if Defendant had informed its customers that Defendant's data and cyber security measures were inadequate, Defendant would not have been permitted to continue to operate in that fashion by regulators, its shareholders, and its consumers.

146. As a result of Defendant's wrongful conduct, Defendant has been unjustly enriched at the expense of, and to the detriment of, Plaintiff and Class. Defendant continues to benefit and profit from their retention and use of the PII while its value to Plaintiff and Class has been diminished.

147. Defendant's unjust enrichment is traceable to, and resulted directly and proximately from, the conduct alleged in this complaint, including compiling, using, and retaining Plaintiff and

Class PII, while at the same time failing to maintain that information secure from intrusion and theft by hackers and identity thieves.

148. Plaintiff and Class have no adequate remedy at law.

149. Under principals of equity and good conscience, Defendant should not be permitted to retain the money belonging to Plaintiff and Class because Defendant failed to implement (or adequately implement) the data privacy and security practices and procedures that Plaintiff and Class paid for and that were otherwise mandated by federal, state, and local laws and industry standards.

150. As a direct and proximate result of Defendant's conduct, Plaintiff and Class have suffered and will continue to suffer other forms of injury and/or harm. Defendant should be compelled to disgorge into a common fund or constructive trust, for the benefit of Plaintiff and Class, proceeds that they unjustly received from them.

**COUNT IV**  
**Breach of Fiduciary Duty**  
**(On behalf of Plaintiff and the Class)**

151. Plaintiff and Class re-allege and incorporate all foregoing paragraphs of this Complaint.

152. Defendant owed a fiduciary duty to Class Members, (1) for the safeguarding of Plaintiff and Class Members' PII; (2) to timely notify Plaintiff and the Class of a Data Breach and disclosure; and (3) to maintain complete and accurate records of what information it stored on behalf of Plaintiff and the Class.

153. Defendant has a fiduciary duty to act for the benefit of Plaintiff and the Class upon matters within the scope of Defendant's relationship with its patients, in particular, to keep secure their PHI.

154. Defendant breached their fiduciary duties to Plaintiff and the Class by failing to diligently discovery, investigate, and give notice of the Data Breach in a reasonable and practicable period.

155. Defendant breached their fiduciary duties to Plaintiff and the Class by failing to encrypt or otherwise protect the integrity of the systems containing Plaintiff and the Class's Private Information.

156. Defendant breached their fiduciary duties owed to Plaintiff and the Class by failing to timely notify and/or warn Plaintiff and the Class of the Data Breach.

157. Defendant breached their fiduciary duties to Plaintiff and the Class by failing to otherwise safeguard Plaintiff and the Class's PII.

158. As a direct and proximate result of Defendant's above-described breach of implied contract, Plaintiff and the Class have suffered, and will continue to suffer, ongoing, imminent, and impending threat of identity theft crimes, fraud, and abuse, resulting in monetary loss an economic harm; actual identify theft crimes, fraud, and abuse resulting in monetary loss and economic harm; loss of the confidentiality of the stolen confidential data; the illegal sale of the compromised data on the dark web; expenses and/or time spent on credit monitoring and identity theft insurance; time spent scrutinizing bank statements, credit card statements, and credit reports; expenses and/or time spent initiating fraud alerts, decreased credit scores and ratings; lost work time; and other economic time that the Plaintiff and Class have not been compensated for.

159. As a direct and proximate result of Defendant's breach of fiduciary duties, Plaintiff and Class have suffered and will continue to suffer other forms of injury and/or harm, and economic and non-economic losses.

**COUNT V**  
**Declaratory Judgment and Injunctive Relief**

**(On behalf of Plaintiff and the Class)**

160. Plaintiff and Class re-allege and incorporate all foregoing paragraphs of this Complaint.

161. Plaintiff pursues this claim under the Federal Declaratory Judgment Act, 28 U.S.C. § 2201.

162. Defendant owes a duty of care to Plaintiff and Class that require it to adequately secure Plaintiff's and Class's PII.

163. Defendant failed to fulfill their duty of care to safeguard Plaintiff's and Class's PII.

164. Plaintiff and Class are at risk of harm due to the exposure of their PII and Defendant's failure to address the security failings that lead to such exposure.

165. Plaintiff, therefore, seeks a declaration that (1) Defendant's existing security measures do not comply with their explicit or implicit contractual obligations and duties of care to provide reasonable security procedures and practices appropriate to the nature of the information to protect customers' personal information, and (2) to comply with their explicit or implicit contractual obligations and duties of care, Defendant must implement and maintain reasonable security measures, including, but not limited to:

- a. Engaging third-party security auditors/penetration testers as well as internal security personnel to conduct testing, including simulated attacks, penetration tests, and audits on Defendant's systems on a periodic basis, and ordering Defendant to promptly correct any problems or issues detected by such third-party security auditors;
- b. Engaging third-party security auditors and internal personnel to run automated security monitoring;
- c. Auditing, testing, and training its security personnel regarding any new or modified procedures;
- d. Segmenting its user applications by, among other things, creating firewalls and access controls so that if one area is compromised, hackers cannot gain access to other portions of Defendant's systems;

- e. Conducting regular database scanning and security checks;
- f. Routinely and continually conducting internal training and education to inform internal security personnel how to identify and contain a breach when it occurs and what to do in response to a breach;
- g. Purchasing credit monitoring services for Plaintiff and Class for a period of ten years; and
- h. Meaningfully educating Plaintiff and Class about the threats they face as a result of the loss of their PII to third parties, as well as the steps they must take to protect themselves.

### **PRAYER FOR RELIEF**

WHEREFORE, Plaintiff, on behalf of herself and all Class, requests judgment against Defendant and that the Court grant the following:

1. For an order certifying the Class and appointing Plaintiff and her counsel to represent the Class;
2. For an order enjoining Defendant from engaging in the wrongful conduct alleged herein concerning disclosure and inadequate protection of the PII belonging to Plaintiff and Class;
3. For injunctive relief requiring Defendant to:
  - a. Engage third-party security auditors/penetration testers as well as internal security personnel to conduct testing, including simulated attacks, penetration tests, and audits on Defendant's systems on a periodic basis, and ordering Defendant to promptly correct any problems or issues detected by such third-party security auditors;
  - b. Engage third-party security auditors and internal personnel to run automated security monitoring;
  - c. Audit, test, and train its security personnel regarding any new or modified procedures;
  - d. Segment their user applications by, among other things, creating firewalls and access controls so that if one area is compromised,

- hackers cannot gain access to other portions of Defendant's systems;
- e. Conduct regular database scanning and security checks;
  - f. Routinely and continually conduct internal training and education to inform internal security personnel how to identify and contain a breach when it occurs and what to do in response to a breach;
  - g. Purchase credit monitoring services for Plaintiff and Class for a period of ten years; and
  - h. Meaningfully educate Plaintiff and Class about the threats they face as a result of the loss of their PII to third parties, as well as the steps they must take to protect themselves.
4. An order instructing Defendant to purchase or provide funds for credit monitoring services for Plaintiff and all Class members;
  5. An award of compensatory, statutory, nominal and punitive damages, in an amount to be determined at trial;
  6. An award for equitable relief requiring restitution and disgorgement of the revenues wrongfully retained as a result of Defendant's wrongful conduct;
  7. An award of reasonable attorneys' fees, costs, and litigation expenses, as allowable by law; and
  8. Such other and further relief as this Court may deem just and proper.

**DEMAND FOR JURY TRIAL**

Plaintiff hereby demands this matter be tried before a jury.

Respectfully Submitted,

Dated: April 30, 2024
