

UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF WASHINGTON
AT SEATTLE

LISA TAYLOR, individually and on behalf of all others similarly situated.

NO.

Plaintiff,

CLASS ACTION COMPLAINT

COSTCO WHOLESALE CORPORATION,

JURY TRIAL DEMANDED

Defendant.

COMES NOW Plaintiff Lisa Taylor, by and through counsel, individually and on behalf of all others similarly situated, and for her Class Action Complaint against Costco Wholesale Corporation (“Costco”), states and alleges as follows, which is based upon personal knowledge as to her own experience and based upon information and belief as to all other matters:

INTRODUCTION

1. Costco has made its \$4.99 rotisserie chicken a viral, nationwide sensation, aggressively marketing it as a convenient, high-quality, and safe meal staple. As noted in a December 2025 Farm Forward article:

The Costco chicken is convenient and notoriously cheap, an automatic purchase for millions of Americans every time they visit the store. It's also a key part of

Costco's brand identity: a symbol of quality, consistency, and member value.¹

2. Far from just another grocery item, Costco's rotisserie chicken is a flagship product that has become widely associated with consistency, convenience, and value. Not unlike its similarly well-known hot dogs, Costco deliberately uses this product as a classic loss leader. It sells it at the artificially low price of \$4.99—sacrificing profit or even selling at a financial loss—to entice members into its warehouses, knowing it will drive up traffic and create ancillary sale opportunities.

3. Costco's aggressive marketing of its chickens as safe and wholesome meal option belies a starkly different reality: Costco's poultry operation has been persistently plagued by systematic Salmonella contamination that exposes consumers to serious health risks. United States Department of Agriculture ("USDA") inspection records reveal that Costco's dedicated chicken-processing plant has failed federal food safety standards nearly continuously since it opened.²

4. Indeed, Costco’s Nebraska poultry facility (Lincoln Premium Poultry)—which supplies its famous rotisserie chickens and Kirkland Signature raw chicken products—has earned the USDA’s worst food safety rating, Category 3, in roughly 92% of reporting periods since 2019.³ A Category 3 rating means the plant exceeded the USDA’s allowable contamination rates, effectively “failing” Salmonella safety tests.

5. And the problem is only getting worse: from late 2023 through mid-2025,

¹ See Farm Forward, *Inside Costco's Chicken Supply Chain: Salmonella Contamination and the True Costs of the \$4.99 Rotisserie Chicken* (Dec. 2025) <https://www.farmforward.com/publications/inside-costcos-chicken-supply-chain-salmonella-contamination-and-the-true-costs-of-the-4-99-rotisserie-chicken/>.

² See Farm Forward, *The Truth Behind Costco's Famous \$4.99 Rotisserie Chicken* (Dec. 2025) <https://www.farmforward.com/news/the-truth-behind-costcos-famous-4-99-rotisserie-chicken/>.

1 Costco's plant **failed every single monthly Salmonella test** (Category 3 rating 100% of the
 2 time),⁴ reflecting chronic, uncontrolled and unresolved contamination levels. Even Consumer
 3 Reports has flagged Costco's Nebraska facility as one of the "most contaminated poultry
 4 plants" in the nation based on five years of USDA data through July 2025.⁵ These sustained
 5 failures present an elevated risk profile that would be material to consumers purchasing
 6 Costco's chicken products.

7 6. Costco's conscious business decisions have directly led to this food safety crisis.
 8 Determined to keep its chicken at the perceived magic \$4.99 price point, Costco in 2019 built a
 9 \$450 million poultry complex in Fremont, Nebraska, operated by its affiliate Lincoln Premium
 10 Poultry ("LPP"), to vertically integrate chicken production from farm to store. By controlling
 11 every stage of production—from breeding and raising birds to slaughtering, processing, and
 12 distribution—Costco sought to cut out middlemen, reduce costs, and guarantee a steady supply
 13 of cheap chickens. This unprecedented level of vertical integration means Costco wields
 14 complete control over how its chickens are bred, fed, housed, and processed, with no third-
 15 party supplier to blame. In the words of one food safety advocate, "*Costco has 100% control.*
 16 *They get to decide how the birds are raised . . . what genetics are used . . . how the birds are*
 17 *killed . . . And right now they're choosing the worst option.*"⁶

20 7. While this could be an opportunity for an extremely high level of quality
 21

23 ⁴ Sentient Food, *Costco Chicken Processing Plant Keeps Failing Tests for Salmonella* (Dec. 15,
 2025) <https://sentientmedia.org/costco-chicken-plant-keeps-failing-tests-for-salmonella/>.

24 ⁵ Consumer Reports, *The Most Contaminated Poultry Plants in the U.S. October 2025 Report*
 25 (Oct. 2025) <https://advocacy.consumerreports.org/wp-content/uploads/2025/09/Most-Contaminated-Poultry-Plants-October-2025.pdf>.

26 ⁶ Sentient Food, *Costco Chicken Processing Plant Keeps Failing Tests for Salmonella* (Dec. 15,
 2025) <https://sentientmedia.org/costco-chicken-plant-keeps-failing-tests-for-salmonella/>.

1 control, the opposite has been true. Sadly, Costco's drive to minimize costs has come at the
 2 expense of basic food safety: the company's choices in genetics, husbandry, and processing
 3 have created fertile conditions for Salmonella to spread, resulting in poultry products riddled
 4 with dangerous bacteria. What began as a strategy to keep prices low has spiraled into a serious
 5 public health concern.⁷ In essence, Costco has prioritized keeping its chickens at \$4.99 over
 6 ensuring those chickens are safe to eat, all while holding out its poultry to consumers as top-
 7 quality and wholesome, without any meaningful disclosures of the problems that plague its
 8 poultry production plant.

10 8. Costco's failure to control Salmonella in its chicken supply is not a harmless
 11 technicality—it poses a real danger to consumers and violates their trust. Salmonella is one of
 12 the leading causes of foodborne illness and death in the U.S., and contaminated chicken is the
 13 number one cause of Salmonella-related sickness nationally.⁸ Federal standards reflect this risk:
 14 the USDA requires that no more than 9.8% of whole chickens test positive for Salmonella in
 15 order for a plant to be considered in compliance.⁹ Yet Costco's Nebraska plant has flunked
 16 even this lenient standard nearly all of the time.

18 9. At bottom, every trip to Costco's meat department comes with an unacceptably
 19 high risk of picking up bacteria-laden poultry that could send the entire family to the hospital.
 20 Reasonable consumers do not expect that the Costco chicken in their cart has a double-digit
 21

22 ⁷ Farm Forward, *The Truth Behind Costco's Famous \$4.99 Rotisserie Chicken* (Dec. 2025)

24 ⁸ Civil Eats, *Poultry Plants Consistently Violate Salmonella Standards* (Nov. 3, 2025)
 25 <https://civileats.com/2025/11/03/poultry-plants-consistently-violate-salmonella-standards-report-finds/>.

26 ⁹ Farm Forward, *The Truth Behind Costco's Famous \$4.99 Rotisserie Chicken* (December
 27 2025) <https://www.farmforward.com/news/the-truth-behind-costcos-famous-4-99-rotisserie-chicken/>.

percentage chance of containing a dangerous pathogen—especially not when Costco has heavily implied that its tightly controlled supply chain would ensure quality and safety. By omitting any disclosure of this pervasive contamination, and by affirmatively promoting its chickens as safe, USDA-inspected, and subject to Costco's high standards, Costco has misled customers and violated consumer-protection laws.

10. From a regulatory standpoint, companies in the poultry industry are generally not held directly accountable by government agencies for animal welfare or for Salmonella in raw meat, and Costco has taken full advantage of that lack of accountability. But consumer protection law does not turn a blind eye when a company's practices make its food hazardous and its marketing misleads customers about safety.

PARTIES, JURISDICTION AND VENUE

11. Plaintiff Lisa Taylor is a natural person residing in Affton, Missouri. Plaintiff is a Costco member and a regular purchaser of chicken products sold by Costco, including its \$4.99 rotisserie chickens.

12. Defendant Costco Wholesale Corporation is a Washington corporation with its principal place of business in Issaquah, Washington. Costco operates a chain of membership-based warehouse clubs throughout the United States (and internationally), selling a wide range of consumer goods including groceries. As of 2025, Costco was ranked 12th on the Fortune 500 rankings of the largest United States corporations by total revenue. Costco operates over 600 warehouses in the U.S. and Puerto Rico, serving tens of millions of members.

13. Costco is also one of the largest poultry retailers in the country, slaughtering and selling roughly 100 million chickens each year, of which a substantial portion are supplied by its in-house Nebraska plant. At all relevant times, Costco was acting in the regular course of its

1 trade or commerce as a merchant of food products. Costco at all relevant times owned or
 2 controlled the Nebraska poultry processing facility (Lincoln Premium Poultry) that produces
 3 Costco's chicken products at issue.¹⁰ Costco, directly and through its agents and subsidiaries,
 4 transacts business in the State of Washington and in every state where its warehouses are
 5 located.

6 14. This Court has personal jurisdiction over Costco because Costco's principal
 7 offices are in Washington, and Costco has purposefully availed itself of the laws and markets of
 8 Washington. Costco conducts substantial business in Washington (and specifically within the
 9 Western District), including maintaining its corporate headquarters and flagship stores, and
 10 making marketing, pricing, and product safety decisions in this District. The wrongful conduct
 11 alleged in this Complaint was conceived, directed, or executed from Costco's Washington
 12 headquarters, such that Costco's actions in Washington gave rise to the claims of Plaintiff and
 13 the class. Costco also consented to jurisdiction by registering to do business in Washington and
 14 by engaging in continuous and systematic activities within the state.
 15

16 15. Costco's executive offices and corporate decision-makers are located in
 17 Washington State, and Costco's actions and omissions alleged herein were orchestrated from
 18 its Washington headquarters. This includes decisions regarding how to price and market its
 19 rotisserie chicken, whether to disclose or address contamination issues, and oversight (or lack
 20 thereof) of its poultry processing subsidiary. Thus, venue is proper in the Western District of
 21 Washington under 28 U.S.C. § 1391.
 22

23 16. This Court has subject matter jurisdiction over this action under 28 U.S.C.
 24 § 1332(d)(2). The proposed class includes at least hundreds of thousands of members (if not
 25

26¹⁰ See <https://lincolnpremiumpoultry.com/> (stating Costco is "owner and customer").

1 millions) scattered across multiple states, and the amount in controversy exceeds \$5,000,000 in
 2 aggregate value. Minimal diversity is satisfied because Plaintiff is a citizen of a state (Missouri)
 3 different from the home state of the Defendant (Washington).

4 FACTS COMMON TO ALL COUNTS

5 **I. Costco's \$4.99 Rotisserie Chicken is a Huge Part of its Brand Identity and** 6 **Marketing Push**

7 17. Costco's rotisserie chicken is famous for its inflation-proof \$4.99 price, a figure
 8 that has not changed for decades despite rising costs. This impossibly low price has been
 9 instrumental in its massive sales—in Fiscal Year 2025 alone, Costco sold 157.4 million
 10 rotisserie chickens—and draws throngs of shoppers into its stores.¹¹ Indeed, customers will
 11 flock to a store and often wait in line primarily to grab the chicken, which is priced far below
 12 most competitors' offerings.

14 18. A typical Costco rotisserie chicken is large (around 3 pounds), seasoned, and
 15 ready to eat, and is marketed as an easy meal that can be used for several days or feed a family
 16 affordably. Costco openly acknowledges that it loses money on each rotisserie chicken sale, but
 17 the company willingly shoulders that loss because it drives demand for their stores generally
 18 and helps justify the annual membership fees that are Costco's profit engine.¹²

19 19. As one retail analyst put it, "The warehouse club loses money selling the
 20 chickens, but makes up for it in added sales and by enticing members to its stores" (i.e. it's a
 21
 22
 23
 24

25 ¹¹ <https://central.virtualshareholdermeeting.com/vsm/web?pvskey=COST2026>

26 ¹² Bizjournal, *Costco sets sales records for its hot dogs and rotisserie chickens* (Jan. 22, 2024),
<https://www.bizjournals.com/austin/bizwomen/news/latest-news/2024/01/costco-hot-dogs-chickens-record-sales.html>.

1 classic “loss leader” strategy).¹³

2 **Costco’s Chicken is Held Out to Consumers as Safe and High Quality**

3 20. Implicit in Costco’s rotisserie chicken offering is a representation that the
 4 product delivers not only value, but quality and safety consistent with Costco’s brand
 5 standards. In fact, until Costco changed its rotisserie chicken packaging towards in 2024, an
 6 express quality guarantee stating that, “Every Kirkland Signature product is guaranteed to meet
 7 or exceed the quality standards of the leading national brand” prominently appeared in boldface
 8 type, enclosed in a black box to draw attention to it, directly on rotisserie chicken labels.

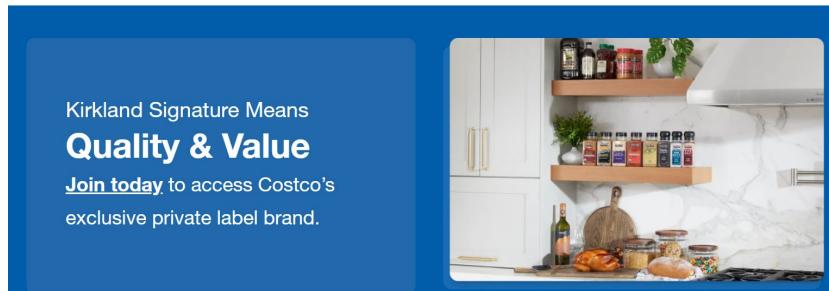

19 21. But the new plastic bag packaging is still branded as Kirkland Signature
 20 Seasoned Rotisserie Chicken.

26 ¹³ Yahoo! Finance, *USDA: Costco has a serious problem with its \$4.99 chicken* (Jan. 13, 2026)
<https://finance.yahoo.com/news/usda-costco-dangerous-problem-4-000000817.html>.

22. According to Costco, "Kirkland Signature Means Quality & Value."¹⁴

20 "Kirkland Signature products are high quality, offered at prices that are generally lower than
 21 national brands . . . We expect to continue to increase the sales penetration of our private-label
 22 items."¹⁵ "Maintaining consistent product quality [of the Kirkland Signature brand],
 23 competitive pricing, and availability of these products is essential to developing and
 24

25
 26¹⁴ <https://www.costco.com/f/-/about-kirkland-signature>

¹⁵ <https://bit.ly/4tvT5Re>

1 maintaining member loyalty.”¹⁶

5 A commitment to quality and value at
6 923 locations and on Costco.com

7 23. The company touts its “Commitment to quality” and control over “carefully
8 choosing products based on quality, price, brand and features,”¹⁷ Costco acknowledges that its
9 “shoppers are attracted principally by the quality of the merchandise and low prices”¹⁸ and that
10 if suppliers are “unable to timely supply us with quality merchandise . . . [or] not adhere to our
11 quality control” then it will adversely affect company sales.

14 **FY 2025 sales: ~\$90B**

- 15
- 16
 - 17 • We control the quality, value for our members
 - 18 • Ability to build/create a better item
 - 19 • Innovative packaging, clean ingredients, full
traceability
 - 20 • Ensure global supply for our future
 - 21 • 20% value to the national brand

22 19

23

24 24. Through its quality and Kirkland Signature guarantees (including by not
25 stopping the usage and sale of its chickens supplied by its Lincoln Premium Poultry plant),
26 together with in-store signage and Costco’s broader marketing and reputation, Costco conveys

¹⁶ *Id.*

¹⁷ <https://www.costco.com/f/-/about>; <https://www.costco.com/f/-/company-information>

¹⁸ https://s201.q4cdn.com/287523651/files/doc_financials/2025/ar/COST-Annual-Report-2025.pdf

¹⁹ Image from: <https://central.virtualshareholdermeeting.com/vsm/web?pvskey=COST2026>

1 to consumers that its rotisserie chicken is produced and sold in accordance with high quality
 2 and safety standards.

3 25. Today, Costco aggressively markets its rotisserie chickens as a ready-to-eat food
 4 intended for immediate household consumption. The products are displayed to consumers
 5 bearing USDA “Grade A” inspection marks and are presented without qualification or caution,
 6 in a manner that communicates ordinary safety and suitability for family meals. Nothing in
 7 Costco’s display, labeling, or point-of-sale practices alerts consumers that the product carries
 8 any unusual or heightened food-safety risk compared to other prepared foods sold in its
 9 warehouses.

17 26. Similarly, Costco markets its raw chicken products sold under the Kirkland
 18 Signature brand as high-quality staple goods, including through the use of descriptors such as
 19 “Grade A” and the placement of a USDA inspection seal on bulk packaging. Neither the
 20 product labels nor Costco’s advertising disclose that these chicken products were sourced from
 21 a facility with persistently elevated Salmonella contamination rates.

27. While USDA maintains voluntary grading standards for certain raw poultry carcasses and parts, those grades do not apply to cooked or prepared poultry products and do not constitute a safety or quality certification of finished foods.²⁰ Prepared poultry products themselves are not eligible for USDA Grade A designation,²¹ making the designation

²⁰ See USDA, *United States Classes, Standards, and Grades for Poultry* (Aug. 6, 2018), <https://www.ams.usda.gov/sites/default/files/media/PoultryStandard.pdf>.

²¹ See USDA, *Poultry-Grading Manual* (1998), <https://www.ams.usda.gov/sites/default/files/media/PoultryGradingManual.pdf>.

1 inapplicable, and thus highly deceptive when placed on Costco's rotisserie chicken.

2 28. Through its promotion of the \$4.99 rotisserie chicken as a signature offering,
 3 Costco reinforces consumer confidence in the safety and quality of its poultry products. That
 4 marketing posture reasonably leads consumers to assume that a core, high-volume product sold
 5 under Costco's control and branding would not carry undisclosed and atypical food-safety
 6 risks.

7 **II. Costco Assumed Ownership of Every Aspect of the Poultry Products it Offers to
 8 the Public**

9 29. In 2019, Costco took the dramatic step of creating its own poultry supply chain
 10 from scratch. It partnered with growers and invested approximately \$450 million to build a
 11 state-of-the-art poultry complex in Fremont, Nebraska. This complex, operated by Costco's
 12 subsidiary Lincoln Premium Poultry (LPP), includes hatcheries, feed mills, breeder barns,
 13 grow-out barns run by contract farmers, and a large slaughter/processing plant.²² It was
 14 Costco's first attempt to raise and process chickens entirely in-house.

15 30. The Fremont plant now processes over 100 million chickens per year
 16 exclusively for Costco. Those chickens go on to become Costco's rotisserie birds and Kirkland
 17 Signature raw chicken parts sold in stores across the country.

18 31. Costco's decision to vertically integrate its poultry supply chain placed
 19 responsibility for quality control squarely within the company's control. By overseeing
 20 production from egg to shelf, Costco positioned itself to manage costs while maintaining
 21 consistent standards and implementing food-safety controls at each stage of production.

22 <https://lincolnpremiumpoultry.com/>; Farm Forward, *The Truth Behind Costco's Famous \$4.99 Rotisserie Chicken* (December 2025) <https://www.farmforward.com/news/the-truth-behind-costcos-famous-4-99-rotisserie-chicken/>; <https://www.farmforward.com/wp-content/uploads/2025/12/Farm-Forward-Contaminated-Costco-12.3.2025.pdf>.

1 **III. Costco's Venture Into Poultry Processing Has Been a Disaster**

2 32. In reality, however, Costco's experiment in poultry integration has been a
 3 disaster from a food safety standpoint. From the very outset of the Nebraska plant's operations
 4 in 2019, the facility has repeatedly and significantly failed federal Salmonella performance
 5 standards.²³

6 33. The USDA's Food Safety and Inspection Service (FSIS) regularly tests poultry
 7 processing plants for Salmonella and assigns ratings based on what percentage of samples are
 8 contaminated. Plants that meet the standard are in Category 1 or 2, while Category 3 is reserved
 9 for the worst performers that exceed the allowable contamination threshold.

10 34. The applicable performance standard is not zero. Under USDA guidance, a
 11 poultry processing facility may be within the performance standard if up to 9.8% of sampled
 12 whole chicken carcasses test positive for Salmonella; for certain chicken parts, the allowable
 13 positivity rate is higher, reaching up to 15.4%, depending on the product type and sampling
 14 category.²⁴

15 35. Despite these permissive thresholds, Costco's Nebraska facility has repeatedly
 16 failed to remain within the applicable limits. Based on an analysis of USDA inspection data
 17 conducted by Farm Forward, Costco's Lincoln Premium Poultry plant was classified as
 18 Category 3—meaning it exceeded the allowable Salmonella threshold—in approximately 92%
 19 of reporting months since the facility began operations in 2019.²⁵

20
 21
 22
 23 ²³ *Id.*

24 ²⁴ U.S. Department of Agriculture, Food Safety and Inspection Service, *FSIS Directive*
 25 10250.2, <https://www.fsis.usda.gov/policy/fsis-directives/10250.2>.

26 ²⁵ *Id.*; <https://www.farmforward.com/news/the-truth-behind-costcos-famous-4-99-rotisserie-chicken/>; <https://www.farmforward.com/wp-content/uploads/2025/12/Farm-Forward-Contaminated-Costco-12.3.2025.pdf>.

1 36. Stated differently, in the vast majority of testing cycles, more than the permitted
 2 percentage of Costco's whole chickens and chicken parts tested positive for Salmonella. From
 3 September 2023 through July 2025, the facility exceeded the applicable Salmonella
 4 performance standard in every monthly testing period.²⁶ Because FSIS does not distinguish
 5 among degrees of noncompliance beyond Category 3, the precise contamination rates during
 6 those periods are not available to Plaintiff—only that they consistently exceeded the regulatory
 7 threshold.

8 37. However, a closer look at FSIS's Salmonella Verification Testing Monthly
 9 Postings reveals the severity of the plant's situation since it opened in September 2019.²⁷
 10 **Specifically, from March 3, 2019 through May 31, 2025, the Lincoln Poultry Plant's**
 11 **Young Chicken Carcasses were rated in Category 3 in a total of 56 out of 65 reports, and**
 12 **its Chicken Parts were rated in Category 3 in a total of 18 out of 65 reports.**²⁸

13 38. Being rated Category 3 is not just a bureaucratic black mark; it directly
 14 correlates to unsafe products reaching consumers. Government data and Costco's own records
 15 indicate that roughly 1 out of every 10 whole chickens coming out of the Fremont plant (which
 16 become the rotisserie products) was contaminated with Salmonella. Likewise, an estimated 1
 17 out of every 6 packages of Costco's raw chicken parts from that plant carried Salmonella.
 18 These contaminated birds were shipped to Costco warehouses nationwide to be sold to
 19 unsuspecting customers.

20
 21
 22
 23

 24²⁶ <https://sentientmedia.org/costco-chicken-plant-keeps-failing-tests-for-salmonella/#:~:text=The%20Fremont%2C%20Nebraska%20plant%20accounts.com's%20poultry%20companies%20database>.

25²⁷ <https://www.fsis.usda.gov/science-data/data-sets-visualizations/microbiology/salmonella-verification-testing-program-monthly>; <https://www.wattagnet.com/broilers-turkeys/processing-slaughter/article/15528221/lincoln-premium-poultry-plant-set-to-open-in-september-wattagnet>.

1 39. Additionally, the USDA's Food Safety and Inspection Service (FSIS) Office of
 2 Investigation, Enforcement and Audit (OIEA) conducts investigation of poultry, meat and egg
 3 product facilities and acts as an enforcement arm of FSIS criminal, civil and administrative
 4 sanctions and authorities.²⁹ It propounds Quarterly Enforcement Reports that provide a
 5 summary of the enforcement actions FSIS has taken to ensure that meat, poultry, and egg
 6 products reaching consumers are safe, wholesome, and properly labeled.³⁰ The OIEA most
 7 recently issued a Notice of Warning to the Lincoln Premium Poultry Plant on April 22, 2025.³¹

9 40. In practical terms, the documented contamination rates translate into a
 10 materially increased likelihood that consumers purchasing Costco chicken products would
 11 bring Salmonella-contaminated poultry into their homes and consume it. Based on the facility's
 12 testing results, a customer purchasing a chicken faced a meaningful risk that the bird tested
 13 positive for Salmonella prior to cooking. Although proper cooking is intended to eliminate the
 14 pathogen, the presence of Salmonella on incoming carcasses substantially increases the risk of
 15 cross-contamination during handling and preparation, as well as the risk associated with
 16 inadequate or inconsistent cooking—which is precisely why consumers have an interest in
 17 purchasing chicken with a lower risk of Salmonella contamination.

19 41. With respect to raw chicken products, consumers are required to rely on careful
 20 handling and thorough cooking to mitigate contamination risks—an expectation that becomes
 21 materially more burdensome when contamination rates are persistently elevated. Here, the
 22 undisclosed conditions under which Costco's chicken was produced and processed

24 ²⁸ *Id.*

25 ²⁹ <https://bit.ly/4trGr5y>.

26 ³⁰ <https://bit.ly/4tpUc4R>

31 ³¹ https://www.fsis.usda.gov/sites/default/files/media_file/documents/qer-q3-fy2025-tables.pdf

1 substantially increased the likelihood that consumers would encounter Salmonella-
 2 contaminated products at the point of sale, thereby exposing them to an increased risk of
 3 foodborne illness not just from the chicken itself, but from cross contamination of other food
 4 and surfaces that come into contact with the tainted chicken.

5 42. This reality is inconsistent with the quality-control assurances implicit in
 6 Costco's decision to vertically integrate its poultry operations and market those products as a
 7 reliable, high-quality staple. Rather than demonstrating enhanced oversight and safety,
 8 Costco's Nebraska poultry operation has emerged as a statistical outlier within the industry
 9 based on its sustained Salmonella performance results.

10 **IV. Costco is on Constant Notice of its Own Failings, But Has Not Taken Remedial
 11 Action**

12 43. Costco is well aware of these problems. The USDA inspection results are
 13 published and updated frequently, and Costco receives inspection reports and notices from
 14 FSIS when its plant is in Category 3. Shortly after opening in 2020, Costco knew its new plant
 15 was struggling with Salmonella contamination (with internal data showing high positives), yet
 16 it did not disclose this to consumers or cease distribution.³²

17 44. By 2021, the facility continued to be classified predominantly as Category 3, yet
 18 Costco did not implement effective corrective measures to address the issue.³³ This pattern
 19 persisted in subsequent years, during which Costco's senior management was aware that its
 20 flagship \$4.99 rotisserie chicken was being sourced from a facility that repeatedly exceeded
 21 applicable Salmonella performance thresholds.

22
 23
 24
 25 ³² See <https://www.fsis.usda.gov/science-data/data-sets-visualizations/microbiology/salmonella-verification-testing-program-monthly>.

26 ³³ *Id.*

1 45. Additionally, in November 2025, The Street reported that an undercover
 2 investigation showed Costco's supplier chickens were kept in overcrowded, unsanitary
 3 conditions with many birds suffering injuries—conditions ripe for disease.³⁴

4 46. In 2025, the advocacy nonprofit Farm Forward published a detailed report on
 5 Costco's Salmonella rates, garnering national attention and further alerting Costco that the
 6 public was watching.³⁵ Similarly, Consumer Reports in mid-2025 identified Costco's plant as
 7 among the worst in the country.³⁶

8 47. Even after these issues became publicly documented, Costco did not notify
 9 consumers who had purchased its chicken products and did not alter its sales practices. Costco
 10 has issued no warning to its members regarding the contamination concerns. As a result,
 11 despite its knowledge of the sustained Salmonella performance issues, Costco continued to sell
 12 and market its chicken products without disclosure or remedial action consistent with
 13 reasonable consumer expectations.

14 **V. Conditions at Costco's Nebraska Facility and Throughout the Chain of Production
 15 Create a Cycle of Contamination**

16 48. The extraordinary level of Salmonella in Costco's chickens is not merely bad
 17 luck. Instead, it is a direct consequence of how Costco and its contractors breed and raise the
 18 birds. As noted in the Farm Forward Report:

19 Salmonella contamination doesn't emerge out of nowhere. The conditions under
 20 which animals are raised contribute directly to the virulent spread of the disease,
 21 including overcrowding, poor ventilation, unsanitary conditions, and the genetic

22
 23 ³⁴ The Street, *Costco's beloved \$4.99 rotisserie chicken could harbor a nasty secret* (Nov. 9,
 24 2025), <https://www.thestreet.com/retail/costcos-beloved-4-99-rotisserie-chicken-could-harbor-a-nasty-secret>.

25 ³⁵ <https://www.farmforward.com/publications/inside-costcos-chicken-supply-chain-salmonella-contamination-and-the-true-costs-of-the-4-99-rotisserie-chicken/>

26 ³⁶ <https://sentientmedia.org/costco-chicken-plant-keeps-failing-tests-for-salmonella/>

1 uniformity of birds bred to grow so fast that they often collapse under their own
 2 weight and suffer compromised immune systems, making them more susceptible
 3 to disease. Stress during transport and slaughter further increases contamination
 4 risks. It is now understood that the risk of foodborne illness is heightened by
 5 poor animal welfare.³⁷

6 49. These conditions are found in Costco's affiliate's facilities. To maximize
 7 efficiency, Costco's chickens are bred for rapid growth and raised in large, high-density flocks,
 8 circumstances that heighten stress and susceptibility to disease and facilitate the spread of
 9 pathogens within a flock. Once introduced, *Salmonella* can propagate quickly through shared
 10 living environments and handling.

11 50. Costco's vertical integration did not mitigate these conditions and instead made
 12 them worse. Large flock sizes, accelerated production cycles, and reliance on automated
 13 systems allowed contamination present at the farm level to carry through the supply chain.
 14 During transport to the processing facility, birds were subjected to additional stress associated
 15 with crowding and handling, further contributing to the presence of pathogens when flocks
 16 entered the slaughter process.³⁸

17 51. The journey from farm to processing plant provides further opportunity for
 18 contamination. Birds are wrangled and loaded into transport crates. USDA reports from
 19 Costco's LPP operation show that transport conditions have been deplorable at times, leading
 20 to massive die-offs that reflect severe stress and crowding. In recent years, thousands of
 21 Costco's chickens died in transit due to extreme conditions—e.g., 2,000 birds freezing to death
 22 in unheated trucks, 1,600 suffocating from overcrowding and lack of water, and even 1,000

 24 ³⁷ <https://www.farmforward.com/publications/inside-costcos-chicken-supply-chain-salmonella-contamination-and-the-true-costs-of-the-4-99-rotisserie-chicken/>

25
 26 ³⁸ <https://www.farmforward.com/news/the-truth-behind-costcos-famous-4-99-rotisserie-chicken/>

1 perishing in a trailer fire while awaiting unloading.³⁹ These grisly incidents, documented by
 2 USDA inspectors, illustrate the extent to which Costco's system subjects animals to trauma and
 3 illness before they even reach the slaughter line.

4 52. When the chickens finally arrive at the processing plant, they are slaughtered
 5 and eviscerated at industrial line speeds. Where incoming flocks carry Salmonella, routine
 6 processing steps—including cutting, evisceration, and communal chilling—can spread
 7 contamination across multiple carcasses if controls are inadequate.

8 53. The facility's persistent Category 3 classification over an extended period is
 9 consistent with chronic deficiencies in preventing cross-contamination during processing.
 10 Failures at any stage of the slaughter process, including sanitation, temperature control, or
 11 equipment capacity, can permit Salmonella present in a portion of the flock to contaminate a
 12 substantially larger volume of product.

13 54. Conditions earlier in the production chain also bear on these outcomes. Analyses
 14 of USDA data show that periods of elevated Salmonella results at the facility coincided with
 15 citations for humane-handling deficiencies, reflecting production and handling practices that
 16 increase stress and illness in birds and are associated with higher contamination levels.⁴⁰

17 55. A 2021 undercover investigation conducted by Mercy For Animals documented
 18 conditions at contract farms that revealed "dim barns thick with ammonia, birds too large to
 19 stand, open sores, and animals unable to reach food or water." Costco's response was telling: it
 20 dismissed the disturbing footage as "normal and uneventful activity."⁴¹ In other words, Costco
 21

22
 23
 24 ³⁹ <https://sentientmedia.org/costco-chicken-plant-keeps-failing-tests-for-salmonella/>

25 ⁴⁰ <https://sentientmedia.org/costco-chicken-plant-keeps-failing-tests-for-salmonella/>

26 ⁴¹ <https://www.farmforward.com/news/the-truth-behind-costcos-famous-4-99-rotisserie-chicken/>

1 admitted that such conditions were business-as-usual in its low-cost poultry production
 2 model—the same model that yields rampant **Salmonella contamination**.

3 56. As a result of these integrated production and processing practices, Costco's
 4 poultry operation produced chicken products with persistently elevated Salmonella
 5 contamination that entered the consumer marketplace.

6 **VI. Costco Remains Silent and Chooses Inaction and Indifference to Consumer Safety**

7 57. Despite growing public outcry—including a shareholder lawsuit filed in 2021
 8 accusing Costco's directors of breaching fiduciary duties by tolerating illegal animal cruelty in
 9 its poultry supply chain⁴²—Costco has shown no indication of changing its approach.
 10 Approximately 7.2 million chickens under Costco's care die before even reaching slaughter
 11 each year (a staggeringly high mortality figure indicative of poor health conditions).⁴³ Yet
 12 Costco presses on with its high-volume, low-cost production model, seemingly viewing these
 13 losses (both in bird lives and in food safety quality) as acceptable collateral for cheap chicken.

14 58. Costco has not implemented any customer notification or enhanced testing
 15 program, even as data shows its contamination issue is persistent. In short, Costco has put its
 16 head in the sand—continuing to sell its “cheap Costco chicken” while hoping consumers
 17 remain ignorant of the unreasonable risks that come with it.

18 59. Despite some coverage of Costco's practices in industry circles and
 19 publications, the consuming public has remained essentially unaware of the abysmal safety
 20 rating of one of the country's largest producers of poultry. Instead, consumers have relied upon
 21 Costco's representations in believing the chickens were safe. Had they known the true facts
 22
 23
 24

25
 26 ⁴² <https://www.farmforward.com/news/the-truth-behind-costcos-famous-4-99-rotisserie-chicken/>

regarding the risks associated with Costco's poultry, they would not have purchased them, would have paid less for them, or would have otherwise altered their behavior.

60. In light of Costco's superior access to information regarding the contaminated nature of its chicken and failure to disclose the heightened risk of the same to consumers, purchasers of chicken were unaware until recently of the problems with the poultry and the existence of a claim regarding the same. Thus, the statute of limitations has been tolled by virtue of Defendant's fraudulent concealment of the true nature of its chicken products.

PLAINTIFF'S SITUATION IS DEMONSTRATIVE

61. On numerous occasions during the relevant period, Plaintiff bought Costco's \$4.99 rotisserie chicken from Costco warehouse stores in the St. Louis, Missouri metropolitan area. Plaintiff estimates that she made a trip to Costco at least monthly and would pick up one or two rotisserie chickens as a matter of routine on most visits. She would also occasionally order the rotisserie chickens from Costco via Instacart. Plaintiff made these purchases for personal and family consumption.

62. In selecting Costco's chicken products, Plaintiff saw and relied on Costco's in-store marketing and the product labeling, which led her to believe the chickens were safe, healthy, and produced under high standards of quality control.

63. For example, Costco's rotisserie chickens are sold ready-to-eat and labeled with USDA quality marks, which to Plaintiff signified that the product was appropriate for human consumption and complied with food safety laws.

64. Costco's signage and reputation further reinforced that its \$4.99 chickens were a valued, family-friendly product—nothing indicated any extraordinary safety risk. Plaintiff had

43 *Id.*

1 no knowledge of the Salmonella contamination problems in Costco's chicken supply chain and
 2 enhanced risk resulting therefrom, and Costco did not disclose this information at the point of
 3 sale or otherwise.

4 65. Had Plaintiff known that Costco's chicken products were sourced from a facility
 5 with persistently elevated (and failing) Salmonella contamination rates, she would not have
 6 purchased them, or would have paid significantly less for them.

7 66. Plaintiff suffered economic injury at the time of purchase by paying for chicken
 8 products that were worth less than represented due to undisclosed contamination risks. Plaintiff
 9 continues to shop at Costco and wishes to purchase safe and affordable food products in the
 10 future, but absent corrective action and disclosure by Costco, she cannot rely on Costco's
 11 representations regarding the safety of its chicken products and faces a continued risk of future
 12 harm.

14 **CLASS ACTION ALLEGATIONS**

15 67. Class Definition. Plaintiff brings this action pursuant to Rule 23 of the Federal
 16 Rules of Civil Procedure on behalf of herself and a proposed Class defined as follows:

17 All persons in the United States (including its territories) who purchased, for
 18 personal or household use, any Kirkland Signature branded rotisserie chicken or
 19 raw chicken product sold by Costco (including but not limited to) a, during the
 20 period from January 1, 2019 to the present (the "Class Period").

21 68. Excluded from the Class are: (a) any persons who file timely requests to
 22 opt out of this Class; (b) the Defendant, its officers, directors, and employees; (c) any
 23 legal representatives, heirs, or assigns of Defendant; and (d) the judge(s) to whom this
 24 case is assigned and any immediate family members thereof.

25 69. In the alternative, and/or in addition, Plaintiff may seek to certify one or more
 26 subclasses for residents of particular states or for purchasers of particular types of products, to

1 the extent it is found that common issues predominate only within those groupings. Plaintiff
 2 reserves the right to refine the Class definition and/or add subclasses based on information
 3 obtained through investigation and discovery.

4 **70. Numerosity** (Rule 23(a)(1)). The Class is so numerous that joinder of all
 5 members is impracticable. Although the precise number of class members is currently unknown
 6 to Plaintiff, public information and Costco's own data indicate that millions of Costco members
 7 have purchased rotisserie or raw chickens supplied by the Nebraska plant during the Class
 8 Period. Costco sold over 150 million chickens just in 2025 alone. Even assuming only a
 9 fraction of those were from the LPP plant, and considering raw chicken sales, the Class easily
 10 encompasses many hundreds of thousands of consumers (if not millions) across the country.
 11 Class members are geographically dispersed in dozens of states, as Costco operates warehouses
 12 nationwide. The numerosity requirement is thus clearly satisfied.

14 **71. Commonality and Predominance** (Rule 23(a)(2) & 23(b)(3)). There are
 15 numerous questions of law and fact common to the Class, and those questions predominate
 16 over any individual issues. The claims arise from a common course of conduct by Defendant—
 17 namely, Costco's deceptive marketing, production, and sale of chicken products that were
 18 unsafe and presented unreasonable risks to the consuming public. Common questions include,
 19 but are not limited to:

- 21 a. Whether Costco's conduct in selling chicken products with undisclosed high
 22 Salmonella contamination risks constitutes an "unfair or deceptive act or
 23 practice" under the Washington Consumer Protection Act, RCW 19.86.020
 24 b. Whether Costco had a duty to disclose the Salmonella contamination issues to
 25 consumers and knowingly failed to disclose those material facts.

- c. Whether Costco's marketing, labeling, or omissions about its chicken products were likely to mislead a reasonable consumer about the safety and quality of the products.
 - d. Whether the chicken products at issue were unfit for the ordinary purpose of consumption due to the unreasonable risk of contamination and/or actual contamination, thereby breaching the implied warranty of merchantability.
 - e. Whether Costco's conduct injured consumers by causing them to pay money for products they otherwise would not have purchased, or to pay more than they would have in the absence of the misrepresentations and omissions.
 - f. Whether Costco was unjustly enriched as a result of its conduct, at the expense of the class members.
 - g. Whether the foregoing practices by Costco violated consumer protection statutes of Washington (and/or other states, to the extent applicable).
 - h. Whether Class members are entitled to damages, restitution, injunctive relief, and/or other relief as a result of Costco's acts.

72. These common questions have answers that will drive resolution of the litigation for all Class members. Evidence regarding Costco's plant performance, its knowledge, and its representations, is common to all and will not vary from person to person. Thus, common issues predominate over any hypothetical individual issues of reliance or damages calculation.

73. **Typicality** (Rule 23(a)(3)). Plaintiff's claims are typical of the claims of the Class she seeks to represent. Plaintiff, like all Class members, purchased Costco chicken products that were produced by the same methods, subject to the same contamination issues, and marketed in the same manner (without disclosure). The injuries alleged by Plaintiff,

1 including but not limited to economic losses and exposure to safety risks, arise from the same
 2 course of conduct by Costco that affected all class members.

3 **74. Adequacy** (Rule 23(a)(4)). Plaintiff will fairly and adequately represent and
 4 protect the interests of the Class. Plaintiff has no interests that conflict with or are antagonistic
 5 to the interests of other Class members. Plaintiff understands the fiduciary duties of a class
 6 representative and is willing and able to carry them out. Additionally, Plaintiff is represented by
 7 undersigned counsel who are experienced in class action litigation, including consumer
 8 protection and product safety cases. Plaintiff's attorneys have the resources, expertise, and
 9 experience to prosecute this action vigorously and to devote sufficient attention to the case.
 10 Neither Plaintiff nor her counsel have any conflicts of interest with the Class.

12 **75. Superiority** (Rule 23(b)(3)). A class action is superior to other available
 13 methods for the fair and efficient adjudication of this controversy. The injury suffered by each
 14 individual Class member (e.g. the cost of a chicken or a few chickens) is relatively small, on
 15 the order of a few dollars to a few hundred dollars. Thus, the expense and burden of individual
 16 litigation would make it impracticable for most class members to seek redress on their own.
 17 Even if those consumers were aware of their rights (which many are not, given the concealed
 18 nature of the problem), the cost of hiring an attorney to pursue a single claim would far exceed
 19 the potential individual recovery. Aggregating the claims in a class action allows for the
 20 efficient use of judicial and party resources and avoids inconsistent outcomes.

22 **76.** Class treatment is also appropriate because Costco's conduct was uniform across
 23 the Class—the case presents a paradigm of a company-wide policy affecting numerous people
 24 in the same way, which can be best resolved in one proceeding. There are no significant
 25 manageability difficulties anticipated in maintaining this case as a class action. Any potential

1 individual issues (such as differences in how many chickens each person bought) are easily
 2 managed and do not predominate over the common issues. Moreover, if Class members were to
 3 bring individual suits, it would pose a risk of conflicting adjudications and incompatible
 4 standards of conduct for Costco. Class litigation is the superior method to resolve this
 5 controversy fairly and efficiently.

6 **77. Injunctive Relief** (Rule 23(b)(2)). In addition to certification under Rule
 7 23(b)(3), Plaintiff also seeks certification under Rule 23(b)(2) for purposes of injunctive and
 8 declaratory relief. Costco has acted or refused to act on grounds that apply generally to the
 9 Class, making final injunctive relief or declaratory relief appropriate for the Class as a whole.
 10 Specifically, Costco's continued sale of chicken products without disclosing or addressing the
 11 contamination issue is a practice applicable to all class members; an injunction prohibiting such
 12 conduct (or requiring corrective action) would benefit everyone in the Class collectively.
 13 Likewise, a declaration that Costco's conduct violates the law would apply class-wide. Given
 14 that some aspects of relief sought are injunctive in nature, Rule 23(b)(2) certification is proper
 15 (either for a unified class or an injunctive subclass) to ensure Costco is required to ensure that
 16 all Class members are treated equitably.
 17

18

CLAIMS FOR RELIEF
COUNT I – Violation of Washington Consumer Protection Act
(RCW 19.86.020 et seq.)

19 **78.** Plaintiff re-alleges and incorporates by reference all preceding paragraphs as
 20 though fully set forth herein.

21 **79.** Plaintiff is a natural person, and Defendant Costco is a corporation; each is a
 22 “person” within the meaning of RCW 19.86.010(1).

23 **80.** Costco's actions and omissions as described herein constitute “unfair or

1 “deceptive” practices in violation of the Washington Consumer Protection Act (CPA), RCW
 2 19.86.020. Costco’s conduct had the tendency and capacity to mislead a substantial portion of
 3 the public regarding a material fact—namely, the safety and quality of its chicken products.
 4 Through affirmative representations and the omission of material facts, Costco conveyed that
 5 its chickens were safe and wholesome and produced under high standards of quality control,
 6 while knowing or having reason to know that a statistically significant percentage of those
 7 products were affected by persistently elevated Salmonella contamination.
 8

9 81. A reasonable consumer would have been deceived by Costco’s omissions and
 10 false assurances, and Plaintiff and class members were in fact so deceived.

11 82. Costco engaged in trade or commerce within the meaning of the CPA by
 12 marketing, advertising, and selling rotisserie and raw chicken products to retail consumers for
 13 household use. RCW 19.86.010(2). The acts and omissions challenged in this action arose
 14 directly from Costco’s commercial activities as a seller of consumer food products and
 15 occurred in the course of promoting and selling merchandise to the public.
 16

17 83. Costco’s unfair and deceptive practices affect the public interest within the
 18 meaning of RCW 19.86.093(3) because the conduct complained of had the “capacity to injure
 19 other persons” beyond the named Plaintiff. Costco’s marketing and sale of its chicken products
 20 were directed to the general consuming public and occurred in the ordinary course of its
 21 business, rendering the challenged practices capable of repetition. These circumstances satisfy
 22 the public interest requirement of the CPA.
 23

24 84. Costco acted with knowledge of facts material to consumers’ purchasing
 25 decisions and failed to disclose those facts in the marketing and sale of its chicken products.
 26 Costco was aware of persistent Salmonella performance issues at its poultry processing facility

1 yet continued to promote and sell its chicken products without modification or disclosure.
 2 Regardless of Costco's state of mind, its conduct constituted an unfair or deceptive practice
 3 because it was likely to mislead reasonable consumers regarding the safety and quality of the
 4 products.

5 85. Costco's conduct departed from food-safety standards established under state
 6 and federal law that are intended to protect consumers, further underscoring the materiality of
 7 the undisclosed contamination risks.⁴⁴ Plaintiff does not seek to enforce those regulatory
 8 schemes directly, but alleges that Costco's failure to disclose information bearing on product
 9 safety constitutes an unfair or deceptive practice actionable under the CPA.

11 86. As a direct and proximate result of Costco's unfair and deceptive acts, Plaintiff
 12 and the Class have sustained damages. Plaintiff and Class members suffered economic injury at
 13 the point of sale, because they paid money for chickens that were represented to be safe and of
 14 high quality when in fact the products delivered were worth significantly less (or had
 15 significantly diminished value) due to undisclosed contamination risks and safety defects. Had
 16 they been aware of the true conditions under which Costco's chicken products were produced,
 17 Plaintiff and Class members would not have purchased the products or would have paid less for
 18 them.

20 87. Pursuant to RCW 19.86.090, Plaintiff and Class members are entitled to recover
 21 actual damages, which may include the full retail purchase price of the chicken products or at
 22 least the difference in value between the product as represented and as received, plus court
 23 costs and reasonable attorneys' fees.

25 88. Furthermore, treble damages are authorized under the CPA. Accordingly,

26⁴⁴ *See, e.g.*, 21 U.S.C. § 342; RCW 15.130.200; RCW 15.130.410; Mo. Rev. Stat. § 196.015.

Plaintiff, on behalf of the Class, seeks an award of treble damages up to \$25,000 per class member as permitted by law, due to the willful and egregious nature of Costco's conduct.

89. Plaintiff also seeks injunctive relief under RCW 19.86.090 to enjoin Costco from continuing the unfair or deceptive acts and to require corrective measures. Specifically, Plaintiff requests an order prohibiting Costco from selling or marketing its chicken products in the misleading manner described, and/or requiring Costco to adequately test and remediate Salmonella contamination and to disclose such contamination risks to consumers. Such injunctive relief is necessary to prevent further injury to the public. Plaintiff additionally seeks any other relief the Court deems appropriate under the CPA, including restitution where applicable (although overlapping, as addressed in other counts).

Count II – Unjust Enrichment

90. Plaintiff re-alleges and incorporates by reference all preceding paragraphs as though fully set forth herein.

91. Plaintiff and the Class conferred a monetary benefit upon Defendant Costco in the form of the money they paid to buy Costco's rotisserie and raw chicken products. Specifically, Plaintiff and Class members each paid the purchase price (e.g., \$4.99 for a rotisserie chicken, or varying prices per pound for raw chicken) to Costco, and Costco accepted and retained those payments. To the extent that, as described herein, Defendant offers its rotisserie chickens below cost to spark demand for its memberships and encourage members to shop at its stores, Defendant also benefitted from Plaintiff and the Class's patronage generally and their membership dues.

92. Under the circumstances, it would be unjust and inequitable for Costco to retain the benefits provided by Plaintiff and Class members. Costco induced these purchases through

1 misleading representations and omissions regarding the safety and quality of the products.
 2 Costco knowingly sold a defective and unsafe product—chicken laden with excessive
 3 Salmonella—yet failed to disclose this and continued to market the product as if it were
 4 wholesome. Had Plaintiff and Class members known the truth, they would not have bought
 5 Costco's chicken or would have paid far less. Thus, Costco was enriched by revenues that it
 6 would not have obtained in a fair marketplace.

7 93. Additionally, by saving money through lax safety practices (and using the
 8 chickens to draw in customers), Costco increased its profits at consumers' expense. Costco's
 9 retention of the full purchase price and other benefits violates fundamental principles of justice,
 10 equity, and good conscience.

12 94. There is a direct relationship between Plaintiff's loss and Costco's gain: every
 13 dollar class members spent on the chicken went into Costco's coffers. This enrichment was
 14 "unjust" because Costco's conduct—selling unsafe products and misrepresenting them—is
 15 morally blameworthy and against public policy.

17 95. Costco has failed to provide refunds or make any compensation to purchasers
 18 for the issues at hand, thus continuing to hold the benefits.

19 96. In the alternative to the legal claims pleaded and in the event they are
 20 unsuccessful, Plaintiff and Class lack an adequate remedy at law to restore the benefit they
 21 conferred.

22 97. Under the doctrine of unjust enrichment, Plaintiff and the Class seek restitution
 23 from Costco, in an amount equal to the monies paid to purchase the chicken products, or
 24 disgorgement of the profits that Costco unjustly obtained from those transactions. This includes
 25 interest and any other appropriate relief. If full monetary refunds are not feasible, the Court
 26

1 should impose a constructive trust or other equitable mechanism to ensure funds are returned or
 2 used for the benefit of the Class.

3 **Count III – Breach of Implied Warranty of Merchantability**
 4 **(RCW 62A.2-314 and Uniform Commercial Code)**

5 98. Plaintiff re-alleges and incorporates by reference all preceding paragraphs as
 6 though fully set forth herein.

7 99. Costco is a merchant with respect to goods of the kind at issue (chicken meat
 8 products), and in fact is a major retail seller of food products. Under the Uniform Commercial
 9 Code as adopted in Washington (RCW 62A.2-314) and similar laws in other states, an implied
 10 warranty of merchantability was in effect for the chicken products that Costco sold to Plaintiff
 11 and Class members.

12 100. This implied warranty means that the seller promises, among other things, that
 13 the goods are of fair average quality and fit for the ordinary purposes for which such goods are
 14 used.

15 101. Costco did not issue any valid disclaimer of warranty to retail consumers for its
 16 chicken products.

17 102. For a food product to be merchantable and fit for consumption, it must be safe
 18 and wholesome—i.e., not contain contaminants that would make it unsafe to consume if
 19 handled normally. While certain raw foods (like raw chicken) might inherently carry some
 20 bacteria, they are expected to be within reasonable and regulatory levels such that a consumer
 21 can safely cook and consume them using ordinary methods. Ready-to-eat foods (like a cooked
 22 rotisserie chicken) especially should be free from harmful pathogens at the point of sale. At
 23 minimum, a product that violates federal food safety standards or is sold in a state that does not
 24 adequately account for the unreasonable risk of contamination fails the ordinary expectations of

1 the consumer and thus is not of fair average quality.

2 103. Costco breached the implied warranty of merchantability with respect to the
 3 chicken products purchased by Plaintiff and the Class. At the time of sale, the products were
 4 not of merchantable quality nor fit for the ordinary purpose of human consumption, due to the
 5 excessive Salmonella contamination risk and/or actual contamination. The chickens were
 6 defective and unfit because they carried an unreasonable risk of dangerous levels of pathogenic
 7 bacteria, far above what a reasonable consumer would expect in store-bought poultry. They
 8 failed to meet the federal performance standards for Salmonella, which is a further indication
 9 that they were unreasonably dangerous for their ordinary use (food consumption) without
 10 extraordinary precautions.

12 104. A reasonable consumer would not knowingly purchase chicken that has a high
 13 likelihood of causing foodborne illness, and such a product is not fit for ordinary household
 14 meal preparation. Moreover, the rotisserie chickens (intended to be eaten immediately)
 15 absolutely should not contain viable pathogens—to the extent the birds were contaminated
 16 entering the store, any surviving bacteria post-cooking means the ready-to-eat product was
 17 adulterated and unsafe.

19 105. The raw chickens, while expected to be cooked by the consumer, still breached
 20 the warranty because the contamination level was so high that normal handling could easily
 21 result in illness (for example, through cross-contamination or slight undercooking). Indeed,
 22 many Class members likely would not have purchased the raw chicken had they known it
 23 exceeded safety limits, because it essentially required them to assume the extraordinary risk
 24 and labor of decontaminating a product that should have been reasonably safe to begin with.

26 106. The unreasonable risk of Salmonella contamination in Costco's chicken

1 products was present at the time of sale to Plaintiff and Class members. The defect was not
 2 introduced by consumers; rather, it originated from Costco's production, processing, and
 3 distribution chain. Costco delivered a product that was already contaminated (or highly likely
 4 to be contaminated) when it left Costco's control. The products did not substantially change
 5 from the time of leaving Costco's possession to consumption—any contamination issues were
 6 inherent. Therefore, the breach of warranty is attributable to Costco's actions (or inactions)
 7 prior to sale.

9 107. Plaintiff and Class members have given or are not required to give formal notice
 10 of breach to Costco in these circumstances. Costco was constructively aware of the
 11 nonconforming nature of its chickens through its own testing and the public USDA data; thus,
 12 Costco cannot claim surprise. Nonetheless, to the extent any notice requirement applies, Costco
 13 has been made aware of its breach by the filing of this Complaint and by the pre-suit
 14 communications and media reports concerning the issue.

15 108. Additionally, because Costco's misconduct was actively concealed and only
 16 became publicly known through investigations, any requirement of earlier notice should be
 17 deemed satisfied by those public reports and/or should be excused as futile.

19 109. Plaintiff (and many class members) purchased the products directly from
 20 Costco, either in Costco stores or via Costco's website/approved delivery services. Thus, they
 21 are in privity of contract with Costco for purposes of warranty.

22 110. As a direct and proximate result of Costco's breach of the implied warranty of
 23 merchantability, Plaintiff and Class members suffered damages. They did not receive the value
 24 of the goods as warranted. The chickens they bought were worth substantially less than the
 25 price paid because a chicken with an unreasonable risk of contamination is not equal in value to

1 a safe, merchantable chicken. Therefore, Class members have been damaged by at least the
 2 amount of the purchase price of the non-merchantable chickens.

3 **PRAYER FOR RELIEF**

4 WHEREFORE, Plaintiff Lisa Taylor, on behalf of herself and the Class, prays that the
 5 Court enter judgment against Defendant Costco Wholesale Corporation and grant the following
 6 relief:

- 7
- 8 A. Enter an Order certifying this case as a class action pursuant to Rule 23,
 9 appointing Plaintiff as class representative and Plaintiff's counsel as class
 10 counsel, approving notice to the Class, and requiring Defendant to bear the costs
 11 of class notice.
- 12 B. Issue a permanent injunction prohibiting Costco from engaging in the unlawful
 13 acts described herein. In particular, an injunction (1) barring Costco from selling
 14 chicken products from plants that do not meet federal safety standards or that are
 15 contaminated beyond an acceptable level, unless and until full disclosure of the
 16 risk of contamination is made to consumers and appropriate measures are taken
 17 to reduce the risk; (2) requiring Costco to implement remedial measures in its
 18 poultry supply chain to substantially reduce Salmonella contamination (such as
 19 improved sanitation, slower line speeds, better farm conditions, regular testing
 20 and public reporting of contamination rates, etc.); and (3) requiring Costco to
 21 provide corrective notices or warnings to past and future purchasers about the
 22 Salmonella issues until the Court is satisfied that the problem is resolved. The
 23 injunctive relief should be designed to protect consumers from ongoing harm
 24 and ensure compliance with consumer protection laws.
- 25
- 26

- 1 C. Enter an award of compensatory damages in favor of Plaintiff and Class
 2 members for the losses they sustained, in an amount to be proven at trial. This
 3 includes, at a minimum, the refund or return of the purchase price of the chicken
 4 products bought by the Class, or the difference in market value between the
 5 product as advertised (safe chicken) and as delivered. Plaintiff will seek the
 6 maximum recovery allowed by law for each Class member.
- 7 D. Enter an award of treble damages as authorized by the Washington Consumer
 8 Protection Act, RCW 19.86.090, for Costco's willful and flagrant violations.
 9 Plaintiff asks for an award of actual damages up to three times the actual amount
 10 sustained, not to exceed \$25,000 per class member, as permitted by RCW
 11 19.86.090, given the egregious nature of Defendant's conduct and the need for
 12 deterrence.
- 13 E. Award restitution or disgorgement requiring Costco to return all unjust gains to
 14 Plaintiff and the Class. This may overlap with damages, but to the extent any
 15 purchase money or profits derived from the wrongful conduct have not been
 16 accounted for in damages, Costco should be compelled to disgorge them.
- 17 F. Enter an award of reasonable attorneys' fees and costs of suit.
- 18 G. Award pre-judgment interest and post-judgment interest to the extent permitted
 19 by law.
- 20 H. Award such other and further relief as the Court deems just and proper. This
 21 includes any declaratory relief the Court finds appropriate (e.g., a declaration
 22 that Defendant's conduct was unlawful) and any supplemental relief that may be
 23 necessary to effectuate the judgment or to protect Class members' interests.

JURY DEMAND

Plaintiff, on behalf of herself and the Class, hereby demands a trial by jury on all claims and issues in this action that are so triable.

DATED this 12th day of February, 2026.
