

Notice of Data Security Incident

At Wenco Management, LLC (“Wenco”), we are committed to protecting the privacy and security of the information we maintain. We recently identified and addressed a cybersecurity incident involving some of that information. This notice explains the incident and the measures we have taken in response.

On August 21, 2022, we identified a data security incident. We immediately took steps to secure our systems and began an investigation. A cybersecurity firm was engaged to assist. The investigation determined that an unauthorized person gained access to our network on August 21, 2022 and accessed certain files that same day. We conducted a thorough review of the files that were accessed, and they included enrollment records of participants in Wenco’s employer-sponsored health plan. These files contained the names, Social Security numbers, and plan selection information for plan participants.

We are mailing letters to affected individuals and offering eligible individuals credit monitoring services. If you believe you may be affected but do not receive a letter by November 20, 2022, please contact our toll-free dedicated external call center at (866) 409-9434, Monday through Friday from 9:00 am - 7:00 pm EST, excluding major U.S. holidays. To help prevent something like this from happening again, we are enhancing our existing security measures.
