**What Happened?** On April 8, 2024, we discovered suspicious activity within our network. We took steps to secure our environment and forensic specialists were engaged to investigate and understand the nature and scope of the disruption. After a thorough investigation, our investigation determined that certain files and folders from our network were subject to unauthorized access that same day. Out of an abundance of caution, we then began a comprehensive review of these files and folders, and confirmed that certain personal information and protected health information (PHI) was contained in the data set.

**What Information Was Involved?** The information involved varied by individual, but may have included your first and last name along with a Social Security number, driver's license number or government identification number, passport number, date of birth, financial account information, medical diagnostic or treatment information, and health insurance information.

Individuals whose information was involved and for whom we had address information were provided written notice on March 27, 2026.

**What We Are Doing.** We have no indication of fraud or identity theft occurring as a result of this incident. Upon learning of the incident, we took immediate steps to address it, including securing our systems and taking parts of our network offline. Forensic specialists were engaged, and we notified the Department of Health and Human Services, Office for Civil Rights. Additionally, we are offering complimentary credit monitoring and identity protection services, free of charge, to individuals whose Social Security numbers were involved through Cyberscout, a TransUnion company.
